Advanced Video Coding: Principles and Techniques K.N. Ngan,T. Meier,D. Chai,1999-08-31 In recent years the paradigm of video coding has shifted from that of a frame based approach to a content based approach particularly with the finalization of the ISO multimedia coding standard MPEG 4 MPEG 4 is the emerging standard for the coding of multimedia content It defines a syntax for a set of content based functionalities namely content based interactivity compression and universal access However it does not specify how the video content is to be generated To generate the video content video has to be segmented into video objects and tracked as they transverse across the video frames This book addresses the difficult problem of video segmentation and the extraction and tracking of video object planes as defined in MPEG 4 It then focuses on the specific issue of face segmentation and coding as applied to videoconferencing in order to improve the quality of videoconferencing images especially in the facial region Modal based coding is a content based coding technique used to code synthetic objects that have become an important part of video content It results in extremely low bit rates because only the parameters needed to represent the modal are transmitted Model based coding is included to provide background information for the synthetic object coding in MPEG 4 Lastly MPEG 4 the first coding standard for multimedia content is described in detail The topics covered include the coding of audio objects the coding of natural and synthetic video objects and error resilience Advanced Video Coding is one of the first books on content based coding and MPEG 4 coding standard It serves as an excellent information source and reference for both researchers and practicing engineers
