

8. Maintenance

The 301™ speaker enclosures can be cleaned by wiping with a soft damp cloth and a mild detergent. The grille panels require no special care although they may be carefully vacuumed if necessary. All other maintenance should be referred to qualified service personnel.

9. In Case Of Difficulty

If you experience a problem with your 301 speakers, use the following procedures to determine if the difficulty is actually in the speakers or in some other component of your music system.

If one speaker sounds defective, do not switch the speaker cables, as this could damage a speaker. Disconnect the defective speaker at the amplifier output terminals and reconnect it to the amplifier channel that is operating correctly. If the speaker that sounded defective now plays properly, the problem is not in the speaker or wiring.

If trouble appears in both speakers, use the same wiring to connect them to another amplifier or speaker that is known to be working properly. If the speakers now operate correctly, the problem is not in the speakers or wiring.

If trouble persists in one or both speakers, contact your authorized Bose High-Fidelity dealer. He will verify any defects and arrange for service by an authorized service agency or by the Bose factory. Bose Corporation will make every effort to remedy any problem within the terms of the warranty at minimum inconvenience to you.
