

PPO (single) - Attack and extraction

The PPO stays between the threat and the principal to provide cover and evacuate the principal. Important is to get the principal away from the situation (get of the K₁) and create distance from the threat, don't become static, move and make the principal a hard target to attack. When stepping in front use your force and control and push/pull the principal away from the position of the attack. If needed the PPO can also engage the threat either with pistol or hand to hand combat (depending on the situation). Not all PPOs or CPOs are armed. If you engage a threat (at unknown numbers) and you are entangled in a fight, there is no one to protect the principal. Always assess the situation and always think "what if?", what do I do? how do I do it? when do I do it? what resources do I have? how far is it to my nearest safe haven? These things will determine your reaction to an attack.

PPO (single) - Attack and extraction

PPO (option A) - Attack and extraction

CPO leads. The CPO reacts to the threat. The PPO stays in between the CPO and principal and evacuates the principal to the nearest safe haven. Important is to get the principal away from the situation (get of the K₁) and create distance from the threat, don't become static, move and make the principal a hard target to attack. When stepping in front use your force and control and push/pull the principal away from the position of the attack. The CPO if able will rejoin the PPO and principal to support the evacuation. It is true that this could leave the CPO to handle the threat by himself or herself, which is why planning, preparation and liaison with local security and police is so important. Factoring in that extra help and assistance for contingencies is essential, particularly at key events, such as a large event.
