Active Training Melvin L. Silberman, Elaine Biech, 2015-04-20 The all-time bestselling training handbook updated for new technologies and roles. Active Training turns instructional design on its head by shifting the emphasis away from the instructor and on to the learner. Comprehensively updated to reflect the many developments in the field, this new fourth edition covers the latest technologies and applications, the evolving role of the trainer, and how new business realities impact training. Advancing new evidence-based best practices for new trainer tasks, skills, and knowledge, up-to-date theory and research inform the practical tips and techniques that fully engage learners and help them get the most out of sessions. While updated workplace examples and revised templates and worksheets help bring these techniques into the classroom quickly, you'll gain insight into improving training evaluation by using Return on Expectations (ROE). Learn how to extend the value of training programs through transfer of learning and develop fresh engaging methods that incorporate state-of-the-art applications. Active Training designs offer just the right amount of content, the right balance of affective, behavioral, and cognitive learning, a variety of approaches, real-life problem solving, gradual skill building, and engaging delivery that uses the participants' expertise as a foundation for learning. This book is the classic guide to employing Active Training methods effectively and appropriately for almost any topic. Learn how the trainer's role has changed. Engage learners through any training delivery method. Inspire collaboration and innovation through application. Overcome the challenges trainers face in the new business environment. Active Training methods make training sessions fun, engaging, relevant, and most importantly, effective. Participants become enthusiastic about the material and view sessions as interesting challenges rather than as means to fulfill requirements. To bring these widely endorsed methods into your training repertoire, Active Training is the complete practical handbook you need.

Courageous Training Tim Mooney, Robert O. Brinkerhoff, 2008-06-16 Dozens of books have been written about how to do training more effectively with more impact, and so on. Yet despite all that well-meaning advice of the 70 billion spent on training in the U.S.

only 12 to 15 percent actually gets applied in ways that contribute tangible value to organizations. But Tim Mooney and Robert Brinkerhoff have discovered that some iconoclastic trainers achieve breakthrough results by having the courage to break away from the usual approaches and identify what is really needed and what really works. Studying why these bold training leaders were so successful implementing Brinkerhoff and Mooney's High Impact Learning tools and methods led them to distill the principles and practices outlined in *Courageous Training*. Mooney and Brinkerhoff lay out the Four Pillars of Courageous Training, illustrating each with real-life examples that highlight specific concepts, methods, and tools. Going deeper, they delve into the mindset needed to truly transform training, which they summarize in the *Courageous Training Code*. And they present four in-depth case studies written by training leaders in major organizations showing the audacious actions these leaders took to produce dramatic and measurable business results.

[Train The Trainer Workbook](#) Richard Heller Mba, John N. Kalaras, PH.D., 2020-04-29

The *Train the Trainer Workbook* is a guide that helps new and experienced trainers deliver training for best results. It links with the *Train the Trainer Manual*, listing all the how-tos and whys involved in creating and presenting world-class training presentations. The workbook parallels the five sections in the *Train the Trainer Manual* and is a beneficial complement to the manual. Each section provides the reader with tools, sets, linking benefits to the presentation. The reader is encouraged to use the Workbook throughout the entire development of the training program. The first section includes tools for conducting the training needs analysis, linking any training to the organizational goals and objectives. The authors insist that any training must address both new hires and seasoned employees with measurable results that provide real advantages to the organization. Unlike many training systems, this system links training to organizational returns. The philosophy of the authors is that without clear organizational benefits, training is an unproductive entertainment. Section two addresses implementation and introduces new tools to create influential training. It includes a 17-step template that allows the user to create an effective training program, whether it is a single presentation or a multi-session presentation. The exercises include addressing real-world problems demanding solutions. The user isn't left empty-handed but is provided with suggested tools to understand and address the problems. Section three includes twenty specific training techniques to capture the interest of the participants, engage them with the trainer, and other participants, and utilize their experience to integrate the training into future behaviors. Mental engagement is the ultimate goal of all training. These tools provide new trainers with years of experience and experienced trainers with insights into approaches that will solve many of their training frustrations. Section four covers the attributes of inspirational trainers. The Workbook identifies the best and most effective training techniques. It includes a list of 48 traits our trainers have used and that their attendees have liked the most. However, this section is not simply a list of tools but discusses how to incorporate them into any training program. Section 5 argues that training is less an art than it is a science. And any science includes testing to separate the truth from the fiction. In Section 5, the authors include twenty-two graphs and chart techniques trainers can select and use to

monitor and improve their programs These tools are useful by both the trainer and the trainees to measure progress chart successes and help with continual improvement and success In conclusion you should remember that Training is a learnable skill Practice with the tools we have given you apply them and improve your approach Our goal is to make you an effective trainer while helping your organization reinvent itself remain relevant and become more profitable Remember THIS IS A GUIDE FOR THE BEGINNER AND A REFERENCE FOR THE PROFESSIONAL
