Alexandria Plan is Common Core's curriculum tool for the teaching of United States and World History. It is a strategic framework for identifying and using high quality informational texts and narrative nonfiction to meet the expectations of the Common Core State Standards CCSS for English Language Arts/ELA while also sharing essential historical knowledge drawn from the very best state history and civics standards from around the country. The curriculum is presented in this four volume series: Common Core Curriculum United States History Grades K-2, Common Core Curriculum World History Grades K-2, Common Core Curriculum United States History Grades 3-5, and Common Core Curriculum World History Grades 3-5. Features of each book include Learning Expectations which articulate the key ideas, events, facts, and figures to be understood by students in a particular grade span; Suggested anchor texts for each topic; In-depth text studies comprised of text dependent questions, student responses, and assessments based on a featured anchor text; Select additional resources; Concise Era Summaries that orient both teachers and students to the historical background. The curriculum helps teachers pose questions about texts covering a wide range of topics. This volume, Common Core Curriculum United States History Grades K-2, introduces lower elementary students to 18 key eras in our country's history from the original Native American people to modern times through stories that they will treasure forever.

*Mathematics Education* Jacqueline Dewar, Pao-sheng Hsu, Harriet Pollatsek, 2016-11-26. Many in the mathematics community in the U.S. are involved in mathematics education in various capacities. This book highlights the breadth of the work in K-16 mathematics education done by members of US departments of mathematical sciences. It contains contributions by mathematicians and mathematics educators who do work in areas such as teacher education, quantitative literacy, informal education, writing and communication, social justice, outreach and mentoring, tactile learning, art and mathematics, ethnomathematics, scholarship of teaching and learning, and mathematics education research. Contributors describe their work, its impact, and how it is perceived and valued. In addition, there is a chapter co-authored by two mathematicians who have become administrators on the challenges of supporting, evaluating, and rewarding work in mathematics education in departments of mathematical sciences. This book is intended to inform the readership of the breadth of the work and to encourage discussion of its value in the mathematical community. The writing is expository, not technical, and should be accessible and informative to a diverse audience. The primary readership includes all those in departments of mathematical sciences in two or four year colleges and universities and their administrators, as well as graduate students. Researchers in education may also find topics of interest. Other potential readers include those doing work in mathematics education in schools of education and teachers of secondary or middle school mathematics, as well as those involved in their professional development.

**Mathematics and Multi-Ethnic Students** Yvelyn Germain-McCarthy, 2017-05-25. *Mathematics and Multi-Ethnic Students* provides detailed profiles of teachers across the nation who have implemented effective mathematics instruction for diverse student populations.
