**Shapers, Brokers and Doers** Naghmeh Nasiritousi, 2015-12-10 Non state actors such as international environmental organisations business associations and indigenous peoples organisations increasingly take on governance functions that can influence the delivery of global public goods This thesis examines the roles of these actors in the field of global climate change governance Specifically the thesis examines why and how non state actors are involved in global climate change governance the governance activities that they may perform and are perceived to perform and their views on climate change solutions The thesis also discusses the implications of their roles for how authority is shared between states and non state actors in global climate change governance The research questions are addressed by triangulating several empirical methods The results show that the roles of non state actors are continuously evolving and depend on the changing nature of relations between state and non state actors as well as efforts by non state actors to expand their policy space by justifying and seeking recognition for their participation Moreover the findings point to the importance of differentiating between groups of non state actors as they represent diverse interests and have different

comparative advantages across governance activities Which non state actors participate and to what extent therefore has implications for the effects of their involvement in global climate change governance On the basis of a systematic assessment of a set of non state actors this thesis concludes that the key role categories of non state actors in global climate change governance are broadly shapers of information and ideas brokers of knowledge norms and initiatives and doers of implementing policies and influencing behaviours Different non state actors carry out activities within these role categories to different extents In addition to the empirical mapping of the roles of non state actors in global climate change governance this thesis contributes to two strands in the literature one theoretical focusing on the authority and legitimacy of non state actors in global environmental governance and the other methodological offering a toolbox that combines survey data with qualitative methods

**Connecting Abstract Algebra to Secondary Mathematics, for Secondary Mathematics Teachers** Nicholas H. Wasserman, 2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional

development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra Connecting Abstract Algebra to Secondary Mathematics for Secondary Mathematics Teachers is a productive resource for mathematics teacher educators who teach capstone courses or content focused methods courses as well as for abstract algebra instructors interested in making connections to secondary mathematics

**The Bill Gates Problem** Tim Schwab, 2023-11-14 New York Times Editors Choice A powerful investigation of Bill Gates and the Gates Foundation showing how he uses philanthropy to exercise enormous political power without accountability Through his vaunted philanthropy Bill Gates transformed himself from a tech villain into one of the most admired people on the planet Even as divorce proceedings and allegations of misconduct have recently tarnished his public image the beneficence of the Gates Foundation celebrated for spending billions to save lives around the globe is taken as a given But as Tim Schwab shows in this fearless investigation Gates is still exactly who he was at Microsoft a bully and monopolist convinced of his own righteousness and intent on imposing his ideas his solutions and his leadership on everyone else At the core he is not a selfless philanthropist but a power broker a clever engineer who has innovated a way to turn extreme wealth into immense political influence and who has made us believe we should applaud his acquisition of power not challenge it Piercing the blinding halo that has for too long shielded the world's most powerful and most secretive charitable organization from public scrutiny The Bill Gates Problem shows how Gates's billions have purchased a stunning level of control over public policy private markets scientific research and the news media Whether he is pushing new educational standards in America health reforms in India global vaccine policy during the pandemic or Western industrialized agriculture throughout Africa Gates's heady social experimentation has shown itself to be not only undemocratic but also ineffective In many places Bill Gates is hurting the very people he intends to help No less than dark money campaign contributions or big business political lobbying Bill Gates's philanthropic empire needs to be seen as a problem of money in
