Mathematics Curriculum Materials Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and

how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors

Empowering Teachers for Equitable and Sustainable Education Maria Teresa Tatto, 2024-04-16 This groundbreaking book uses a comprehensive study of a novel Master of Education program to showcase how teachers can be engaged in authoritative equity based research using comparative education theory inquiry based pedagogy and the UNESCO SDGs as powerful frameworks By developing agency to advance culturally sustaining and humanizing practices it demonstrates how teachers can promote equity in their classrooms and communities The central premise of the program is that teachers must become comparative global and local action researchers to have agency in their practice and to become effective advocates for the cultural and learning needs of their students especially those in disadvantaged contexts or learning at the bottom of the pyramid By learning comparative framing and social science methods reviewing the literature to select verifiable educational research and developing and implementing a plan for action research this book offers new ideas for how teachers can effectively respond to recent UNESCO calls to reimagine and create promising futures locally By providing formative and summative evidence of culturally and socially transformative learning and showcasing how teacher educators can engage teachers in authoritative justice inquiry based research this book will appeal to scholars faculty and researchers of comparative education and teacher education and development
