**A Learning-Centered Framework for Education Reform** Elizabeth Demarest, 2015-04-24

In her new book, Betty Demarest describes a bold agenda for education reform, one that is firmly grounded in a synthesis of educational research about learning, teaching, and the contexts of education. The author's learning-centered framework includes:

1. a broad and balanced set of education goals
2. a multi-faceted concept of achievement
3. classroom capacity for learning
4. systemic capacity and infrastructure
5. shared reciprocal accountability
6. systems of multiple assessments

New research-based concepts in these six areas are critically compared to older concepts behind standards-based reform and No Child Left Behind. *Book Features:* A comprehensive alternative framework for future education reform that focuses on improving the core educational practices of learning, teaching, content, and leadership. A federal role that emphasizes meaningful partnerships rather than top-down control. A critique of past standards and present accountability-based frameworks with implications of the learning-centered framework for future national policy, especially ESEA. An operational definition of educational capacity, a re-conceptualization of accountability, and a sharp reversal of the relative emphasis placed on these strategies.

Elizabeth J. Demarest is an education consultant living in Alexandria, Virginia. She was formerly with the U.S. Department of Education and the National Education Association. Betty Demarest clearly defines a learning-centered framework for improving policy and practice. Practitioners can benefit from the strategies outlining a clear pathway for transforming to learning-centered practice in our nation's classrooms.

Gerald N. Tirozzi, executive director, National Association of Secondary School Principals. Betty Demarest's deep experience with research and policy development allows her to re-envision reform at many levels, all based on research evidence for valid concepts and practices of teaching and learning. This book is a welcome gift to policymakers and practitioners.

Roland Tharp, research professor, University of California, Berkeley. Demarest provides a research-based foundation for informed discussion and debate as Congress renews federal education law. Her synthesis of key issues should provide a starting point for any serious discussion of the way forward in federal education policy.

Mary Haywood Metz, professor emerita, University of Wisconsin-Madison.
