Integrated Watershed Management Programme (IWMP)**

1.0 Introduction

------(State name) is the one of the State in the country implementing the Integrated Watershed Management Programme (IWMP) of Government of India (GoI) since 2009-10.

Currently four batches of projects are under implementation under IWMP. The implementation is on the lines of the Revised Common Guidelines for Watershed Development Projects-2011, issued by the Government of India (GoI). NGOs play a major role as facilitators of implementation and are involved in creating awareness about the project and capacity building of community based organisations formed under IWMP.

Presently the implementation of projects under III Batch sanctioned during 2011-12 is in the Preparatory Phase. Besides, Under Batch-IV also, projects have been sanctioned during 2012-13 and the implementation of these projects is likely to start soon. **The project period under both batches is a maximum of 4-7 years as stipulated by GoI.**

It is desired that an external MEL &D system for both III and IV batches of IWMP projects is in place at the earliest. The Batch-III projects cover an estimated area----- lakh Ha and are distributed in -----districts of the State. The Batch-IV projects covering an area of 3.32 lakh Ha are also distributed in _____districts of the State. The Revenue Division-wise details of projects are given in Annexure IA.

The MEL&D work in Batch-III projects will commence from the date of signing of agreements with the selected agencies & Batch IV.

The treatable areas given in Annexure IA and Annexure IB are likely to vary by 10-15%, and the exact extent will be known only after the completion of Net Planning process of these projects.

2.1 Major objectives of IWMP

The Integrated Watershed Management Programme (IWMP) is one of the flagship programmes of the Govt. of India and is being implemented by the Department of Land Resources (DoLR) in all states of the country having an outlay of around Rs. 29,000 Crores for the 12th Plan. The programme envisages restoring the ecological balance by harnessing, conserving and developing degraded natural resources such as soil, vegetative cover & water through watershed management initiatives. The objectives otherwise can be stated as-

- i. Increase the productive potential of degraded lands through various watershed interventions.
- ii. Improve the biomass through Agro-Horticulture, Agro-Forestry and Silvi-Pastoral systems.

Hydrosystem Restoration Handbook Saeid Eslamian, Faezeh Eslamian, 2025-11-29 Hydrosystem Restoration Handbook Groundwater Artificial Recharge with Conventional Water GARC introduces innovative groundwater recharge techniques Through the introduction of powerful case studies the book offers key strategies to researchers and graduate students for managing CARC and monitoring groundwater levels Comprehensive structure This book provides a thorough exploration of groundwater recharge starting from foundational concepts and traditional techniques moving through practical case studies and culminating in advanced methodologies and future innovations Real world relevance By presenting diverse case studies and regional implementations this book effectively connects theoretical knowledge to practical applications demonstrating how water challenges are addressed in various contexts around the globe Forward looking perspective With a focus on cutting edge research emerging technologies and sustainable water management practices this book offers readers valuable insights into the evolving field and its potential future impacts **Applications and**

Challenges of Geospatial Technology Pavan Kumar, Meenu Rani, Prem Chandra Pandey, Haroon Sajjad, Bhagwan Singh Chaudhary, 2018-11-24 This book advances the scientific understanding and application of space based technologies to address a variety of areas related to sustainable development including environmental systems analysis environmental management clean processes green chemistry and green engineering Geo spatial techniques have gained considerable interest in recent decades among the earth and environmental science communities for solving and understanding various complex problems and approaches towards sustainable technologies The book encompasses several scopes of interests on sustainable technologies in areas such as water resources forestry remote sensing meteorology atmospheric and oceanic modeling environmental engineering and management civil engineering air and environmental pollution water quality problems etc The book will appeal to people with an interest in geo spatial techniques sustainable development and other diverse backgrounds within earth and environmental sciences field **Water Law in India** Philippe Cullet, Sujith

Koonan, 2018-02-15 First published in 2011 Water Law in India is the only book to offer a comprehensive survey of the legal instruments concerning water in India It presents a variety of national and state level instruments that make up the complex and diverse field of water law and policy This book fills a critical gap in the study of water law providing a rich reference point for the entire gamut of legal mechanisms available in India This edition has been extensively revised to include new instruments on water regulation such as the draft National Water Framework Bill 2016 and the Model Groundwater Sustainable Management Act 2016 new water related instruments in such varied fields as criminal law land acquisition law and rural employment legislation and a chapter on international legal instruments Chapters on drinking water supply environmental dimensions of water conservation water infrastructure for irrigation and flood control groundwater regulation and institutions catering to water have been thoroughly updated for a complete coverage of water law **TERI Energy &**

Energy & Environment Data Diary and Yearbook (TEDDY) 2017/18 TERI, 2019-03-01 TERI Energy Environment Data Diary and Yearbook TEDDY is an annual publication brought out by The Energy and Resources Institute TERI since 1986 It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors coal and lignite petroleum and natural gas power and renewable energy sources energy demand sectors agriculture industry transport household and local and global environment sectors environment and climate change The publication also provides a review of the government policies that have implications for the sectors of the Indian economy In TEDDY an account of India's commercial energy balances is given which provide comprehensive information on energy flows within different sectors of the economy and how they have been changing over time These energy balances and conversion factors are a valuable ready reckoner for researchers scholars and organizations working in the energy sector After the introductory chapters for the ease of readers TEDDY has been divided into sections on energy supply energy demand and local and global environment Interactive graphs figures maps and tables have been used throughout the chapters to explain facts which make the book an interesting read In addition detailed tables at the end of each chapter represent statistical data on each of the above mentioned sectors The publication is accompanied by a complimentary CD containing full text The publication has more than 15 000 readers across the globe and is often cited in international peer reviewed journals and policy documents

TERI Energy & Environment Data Diary and Yearbook (TEDDY) 2018/19 TERI, 2020-11-11 TERI Energy Environment Data Diary and Yearbook TEDDY is an annual publication brought out by TERI since 1986 It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors coal and lignite petroleum and natural gas power and renewable energy sources energy demand sectors agriculture industry transport household buildings and environment local and global Additionally the publication reviews government policies and analyses latest policy discourses that have implications on India's energy and environment sector TEDDY 2018 19 gives an account of

India's commercial energy balances extensively covering energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable reference for researchers, scholars, and organizations engaged in energy and related sectors. After the introductory chapter, TEDDY 2018/19 is divided into three sections: Energy Supply, Energy Demand, and Local and Global Environment. One of the main highlights of TEDDY 2018/19 is the addition of a new chapter, Buildings under Energy Demand section. This chapter gives an in-depth analysis of India's energy consumption by the buildings sector and highlights the role of energy efficiency in buildings from the perspectives of both economy and environment. The thirty-fourth edition of TEDDY continues to remain less prose-intensive with inclusion of more data represented with the help of infographics, thus making the publication an authentic and interesting read. TEDDY 2018/19 also features a section on interlinkages of SDGs with energy and environment. Key Features: Provides a review of government policies, programmes, and initiatives that have implications for the petroleum and natural gas sector and the Indian economy. New chapters on Air Pollution, Solid Waste Management, Water Resource Management, and Land and Forest Resource Management. Exhaustive data from energy supply, energy demand, and local and global environment sectors. Contents: Energy and environment: an overview; Energy supply: Coal and lignite, Petroleum and natural gas, Power, Renewable energy; Energy demand: Agriculture, Industry, Transport, Household energy, Buildings; Local and global environment: Air quality and pollution, Solid waste management, Water resource management, Land and forest resource management, Climate change.

TERI Energy & Environment Data Diary and Yearbook (TEDDY) 2019/20 TERI, 2021-07-01

TERI Energy Environment Data Diary and Yearbook. TEDDY is an annual publication brought out by TERI since 1986. It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors: coal and lignite, petroleum and natural gas, power, and renewable energy sources; energy demand sectors: agriculture, industry, transport, household, buildings, and environment; local and global. Recent changes in the energy sector and environment are depicted with the help of graphs, figures, maps, and tables. The publication also reviews government policies associated with energy and environment. TEDDY 2019/20 gives an account of India's commercial energy balances extensively covering energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable reference for researchers, scholars, and organizations engaged in energy and related sectors. Contents of the book are organized into three sections: Energy Supply, Energy Demand, and Local and Global Environment. Interlinkage of SDGs with energy and environment also forms the subject matter of TEDDY 2019/20. The thirty-fifth edition continues to remain less prose-intensive with inclusion of more data represented with the help of infographics, thus making the publication an authentic and interesting read.
