Communication And Environment Sustainability And Risks:

Communication and Environment: Sustainability and Risks (Penerbit USM) Hamidah Abd. Hamid, Azman Azwan Azmawati, Jamilah Hj. Ahmad, Nik Norma Nik Hasan, 2014-11-25 There is a dearth of literature on environmental communication within the non western world The few existing ones are scattered and not easily available Thus there is a dire need to document research and literature in the field The opportunity arose at the 2009 International Conference on Communication and Environment held in Penang Malaysia The international conference with the theme Transformation for a Sustainable Tomorrow organised by the School of Communication Universiti Sains Malaysia USM attracted scholars practitioners and activists from around the world to listen and deliberate on various aspects of communication and environment The post conference review resulted in the selection of 24 papers to be compiled into this edited volume The escalating degradation of environment locally and globally was the main concern that prompted discussions on how sustainability can be advocated The development process in many countries economic activities and political decisions on issues such as deforestation for timber logging rapid urbanisation pertinently points out that environmental degradation and any communication on environmental change has to be grounded and located within the wider context of social politics and economics of the society Communication and environmental communication for that matter have also to be understood within these wider contexts Many would agree that a constant and consistent flow of information communicated through different channels to different stakeholders at the right time and destinations can help raise awareness and consciousness of environmental problems protection and preservation This vital information can enable the public and stakeholders to make informed choices and take actions whenever possible A lack of communication and information will inordinately exacerbate the situation of environmental degradation This book thus highlights how the environment is being treated in the media communicated to the society and impacted nations The chapters are grouped into the following sections Theoretical and conceptual issues Media content and the environment Politics communication and the environment Corporate social and environmental responsibility and Citizen participation human rights and the environment The editors acknowledge the excellent contributions of all the authors and are indebted to the members of the review panel the external reviewer USM Publications Committee and staff of Universiti Sains Malaysia Press for their help in ensuring the quality of this volume Most importantly we express our gratitude to USM for providing the financial support for the international conference and making it possible to publish this book The Editors January 2012 Universiti Sains Malaysia Penerbit Universiti Sains Malaysia

Western and Chinese academia but also inspire students and practitioners to apply risk communication theories to solving real life problems The book will appeal to students scholars and practitioners of risk and environmental communication Effective Risk Communication V.T. Covello, David B. McCallum, Maria T. Pavlova, 2012-12-06 One of the greatest studies challenges facing those concerned with health and environmental risks is how to carry on a useful public dialogue on these subjects In a democracy it is the public that ultimately makes the key decisions on how these risks will be controlled The stakes are too high for us not to do our very best The importance of this subject is what led the Task Force on Environmental Cancer and Heart and Lung Disease to establish an Interagency Group on Public Education and Communication This volume captures the essence of the Workshop on the Role of Government in Health Risk Communication and Public Education held in January 1987 It also includes some valuable appendixes with practical guides to risk communication As such it is an important building block in the effort to improve our collective ability to carry on this critical public dialogue Lee M Thomas Administrator U S Environmental Protection Agency and Chairman The Task Force on Environmental Cancer and Heart and Lung Disease Preface The Task Force on Environmental Cancer and Heart and Lung Disease is an interagency group established by the Clean Air Act Amendments of 1977 P L 95 95 Congress mandated the Task Force to recommend research to determine the relationship between environmental pollutants and human disease and to recommend research aimed at reducing the incidence of environment related disease The Task Force's Project Group on Public Education and Communication focuses on education as a means of reducing or preventing disease

Insurance, Climate Change and the Law Franziska Arnold-Dwyer, 2024-04-03 The insurance industry has found itself at the front line of climate change challenges providing insurance cover in relation to risks associated with climate change As risk carriers insurers pay claims for climate change related losses such as property damage caused by windstorms flooding and wildfires which have been increasing in frequency and severity As major institutional investors insurance companies invest in assets that may be increasingly vulnerable to climate risks Insurance regulators across the globe have therefore started to require insurance companies to identify manage and report on climate change risks that could pose a threat to their financial stability However managing and reporting on the effect of climate risk on an insurer s balance sheet is an inward looking perspective that does not stem climate change It needs to be paired with an outward looking perspective that takes account of the insurance industry s impact on the environment and the insurance industry s capacity to influence what policyholders investee enterprises and other business partners do to address climate change challenges For the insurance industry the key components of positive outward impact are impact underwriting and impact investment This book sets out the current legal and regulatory landscape for impact underwriting and impact investment Whilst the focus of research and regulatory interventions to date has been on inward impact in this book it will be argued that to take positive climate action that supports the Paris Agreement goals and the national and international Net Zero targets the debate should now move on to

considering the positive outward impact the insurance industry can make and how we can create a legal environment to facilitate this The book puts forward the case for a new vision of the role of the insurance industry as climate action enablers and makes proposals for insurance products and risk transfer and loss resilience structures that can support policyholders in their transition to a Net Zero economy The audience for this book will include legal practitioners insurance industry professionals financial and insurance regulators policymakers and interested academics **Risk Communication** Regina E. Bureau régional de l'Europe,2013 Communicating about Risks to Environment and Health in Europe Philip C.R. Gray, Richard M. Stern, Marco Biocca, 2013-04-18 Public experience with risk communication differs greatly from country to country in Europe and there has been little opportunity for the transfer of experience and learning between countries This is especially true for the many new European States including the countries in transition from centralised to market economies This book presents case studies on risk communication One of its unifying concepts is the role of risk communication in the risk management process Technical and philosophical introductions to risk communication and risk management and research in risk communication are given The case studies themselves occupy the central portion of the book each one covering a particular hazard risk or situation seen from a particular point of view The issue of the special circumstances for environmental and health risk communication in central and eastern Europe is also addressed

through a separate presentation and discussion of an appropriate case study A different approach to risk communication is taken by examining how it forms part of the risk management process at the local level Research into risk perception a field that forms an important foundation for many aspects of risk communication is summarised and practical guidelines for risk communication are reviewed These include discussions on how to carry out public information programmes and methods for increasing public involvement in risk management decisions Environmental Communication and the Public Sphere Robert Cox, 2006-01-13 this is an excellent introduction to an important topic Media International Australia Environmental Communication and the Public Sphere is the first comprehensive undergraduate textbook in the growing field of environmental communication It takes as its theme the role of communication in influencing the ways in which we perceive the environment as well as what actions we and others take in our relations to the natural world. The text blends scholarship and hands on experiences to provide a theory based and coherent description of the concrete communication practices and sites in the debates over environment protection The level of presentation targets upper level undergraduate students in speech communication environmental studies English journalism political science and sociology Additional theory and vocabulary are introduced as are case studies and examples for closer examination of the principal sites and practices of environmental communication including forums for public participation advocacy campaigns media coverage of environmental stories risk communication and models of dispute settlement Key Features Provides a core text broad and theoretically coherent coverage that covers all of the basic areas of environmental communication Draws on the author s experiences as president of the largest U S environmental group Summarizes current scholarship in the area and makes accessible many of the practices of media corporations and advocacy groups that are not readily available in public sources Gives students insight into the practical ways to participate publicly in influencing the decisions of governmental agencies that affect the environment Offers a comprehensible treatment of the complexity and range of issues sites and practices in environmental communication Act Locally exercises provide opportunities for students to apply their knowledge of the principles of environmental communication on their campus or community Risk Communication Regina E. Lundgren, 1994 When it comes to risk communication there is little margin for error Not only is it critically important that the communication be clear and easy to understand it must reach all those affected Risk Communication by Regina Lundgren is a handbook designed to help scientists engineers and writers communicate risk more effectively With practical advice on planning the campaign designing messages for a variety of audiences and evaluating the message this book can help you avoid the serious problems that result from inadequate communication of health safety and environmental risks
