A photograph of an Arctic seascape. The foreground and middle ground are filled with numerous white and blue ice floes of various sizes. Two large, dark-hulled ships with masts are visible in the distance, navigating through the ice. The sky is overcast with grey clouds, and a hint of sunset or sunrise is visible on the right side of the horizon.

Community Adaptation And Vulnerability In Arctic Regions:

Community Adaptation and Vulnerability in Arctic Regions Grete K. Hovelsrud, Barry Smit, 2010-09-08 The Year That Changed How We View the North This book is about a new theoretical approach that transformed the field of Arctic social studies and about a program called International Polar Year 2007 2008 IPY that altered the position of social research within the broader polar science The concept for IPY was developed in 2003 2005 its vision was for researchers from many nations to work together to gain cross disciplinary insight into planetary processes to explore and increase our understanding of the polar regions the Arctic and Antarctica and of their roles in the global system IPY 2007 2008 the fourth program of its kind followed in the footsteps of its predecessors the first IPY in 1882 1883 the second IPY in 1932 1933 and the third IPY later renamed to International Geophysical Year or IGY in 1957 1958 All earlier IPY IGY have been primarily geophysical initiatives with their focus on meteorology atmospheric and geomagnetic observations and with additional emphasis on glaciology and sea ice circulation As such they excluded socio economic disciplines and polar indigenous people often deliberately except for limited ethnographic and natural history collection work conducted by some expeditions of the first IPY That once dominant vision biased heavily towards geophysics oceanography and ice sheets left little if any place for people that is the social sciences and the humanities in what has been commonly viewed as the hard core polar research Adaptive Capacity and Environmental Governance Derek Armitage, Ryan Plummer, 2014-07-08 Rapid environmental change calls for individuals and societies with an ability to transform our interactions with each other and the ecosystems upon which we depend Adaptive capacity the ability of a social ecological system or the components of that system to be robust to disturbances and capable of responding to changes is increasingly recognized as a critical attribute of multi level environmental governance This unique volume offers the first interdisciplinary and integrative perspective on an emerging area of applied scholarship with contributions from internationally recognized researchers and practitioners It demonstrates how adaptive capacity makes environmental governance possible in complex social ecological systems Cutting edge theoretical developments are explored and empirical case studies offered from a wide range of geographic settings and natural resource contexts such as water climate fisheries and forestry Of interest to researchers policymakers and resource managers seeking to navigate and understand social ecological change in diverse geographic settings and resource contexts **Northern Sustainabilities: Understanding and Addressing Change in the Circumpolar World** Gail Fondahl, Gary N. Wilson, 2017-01-03 This edited volume examines the multiple dimensions of sustainability in the Circumpolar North a territory facing unprecedented environmental and social challenges at the start of the 21st century The chapters explore the cultural economic political and environmental aspects of sustainability as well as examples of successful research collaboration with northern and indigenous communities By examining a wide range of issues and places the contributions highlight the diversity of the Circumpolar North the challenges and opportunities it faces and the ways in which people and communities are adapting to

and influencing the changing circumstances of this dynamic region Contributors include both Indigenous and non Indigenous researchers from eleven different countries and from across the career spectrum This book will appeal to an academic audience interested in the manifold facets of sustainability in the Arctic and sub arctic regions of the world **The**

Americas and Oceania: Assessing Sustainability Ray C. Anderson, Sara G. Beavis, Michael L. Dougherty, Tirso Gonzales, Ricardo Braun, Muhammad Aurang Zeb Mughal, Mark Wilson, 2012-11-01 The Americas and Oceania Assessing Sustainability provides extensive coverage of sustainability practices in two regions linked culturally and historically by their relative isolation before the Columbian exchange by their colonization after it and by the challenges of pollution resource overuse and environmental degradation Regional experts and international scholars focus on environmental history in areas such as the South Pacific islands now particularly threatened by rising ocean levels due to climate change and on countries whose governments and corporations can play a major role in promoting or discouraging sustainable choices Brazil an emergent power on the world stage the United States the world's third most populous nation and New Zealand seemingly on its way to becoming an enviable model of sustainable development Global Warming and Human - Nature Dimension in Northern Eurasia Tetsuya Hiyama, Hiroki Takakura, 2017-08-14 This book describes the current environmental changes due to global warming in northern Eurasia especially focusing on eastern Siberia Spring flooding ice jam movements and monitoring using remote sensing are included Additionally current reindeer herding of indigenous peoples in Siberia and related environmental changes such as waterlogging rising temperatures and vegetation changes are addressed As a summary the book also introduces readers to adaptation strategies at several governmental levels The book primarily focuses on 1 introducing readers to global warming and human nature dynamics in Siberia with special emphasis on humidification of the region in the mid 2000s and 2 describing social adaptation to the changing terrestrial ecosystem with an emphasis on water environments Adaptation strategies based on vulnerability assessments of environmental changes in northern Eurasia are crucial topics for intergovernmental organizations such as the IPCC Intergovernmental Panel on Climate Change Thus the book offers a valuable resource not only for environmental researchers but also for several stakeholders regarding global environmental change **A Changing Environment for Human Security** Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to

collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice
