Community Guidelines State Aid Environmental Protection:

Law in the EU's Circular Energy System Lucila de Almeida, Josephine van Zeben, 2023-12-11 Adopting a holistic and multidisciplinary approach this expertly crafted book comprehensively maps out the complex multi jurisdictional legal landscape pertaining to the EU's circular energy system Offering in depth critical analysis it identifies several areas of law and policy that require further scholarly inquiry to ensure the creation of an effective policy framework which can facilitate the move from a linear to a circular energy system

Investing in EU Energy Security Henrik Bjørnebye, 2010-08-27 The author of this timely and sharply focused book shows that in the light of our current knowledge ensuring new investments and the right investments in electricity generation constitutes an urgent energy policy challenge facing the EU over the coming decades He accordingly makes the case for a serious reconsideration of the market facilitation and market intervention rules under electricity market legislation in the EU In the first detailed legal analysis of the EU's internal electricity market framework for investments in electricity generation facilities from the perspective of security of supply this book covers such legal issues as the following in precise detail applicability of the Treaty on the Functioning of the European Union TFEU security of supply as a ground for exemption on the basis of public security justifications of public intervention the applicability of EU State aid provisions to investments in energy security requirements imposed by EU law on Member States for ensuring cost efficient investments in European supply security facilitation of renewable energy sources and cogeneration in the environmental interest the Court of Justice's approach to Member State interventions the Court's decisions on restrictions on free movement in the environmental interest Member States right to launch tendering procedures for new generation capacity Member States right to impose public service obligations in the general economic interest on certain undertakings and relationship between the provisions of the TFEU and those of the Euratom Treaty in relation to investments in nuclear power generation Throughout the study in addition to his analysis of the decisions of the Court of Justice and the Court of First Instance the author takes into account legal literature and Union reports preparatory works and working papers The book demonstrates convincingly that today's energy supply challenges must be based on a broader balancing of security competitiveness and sustainability interests It suggests that the internal electricity market provisions of the Electricity Directive and the Security of Electricity Supply Directive would benefit from focusing more intensely on requiring investments in technologies and primary energy sources that will help mitigate climate change and reduce European energy import dependency and less on the need for ensuring cost efficient investments through market based means

EU Renewable Electricity Law and Policy Tim Maxian Rusche, 2015-12-11 This book examines the current state of economic regulation of renewable electricity and explores the possibilities for future harmonized EU regulation

Sixty Years of EU State Aid Law and Policy Eugene Stuart, Iana Roginska-Green, 2016-04-24 If an EU industrial policy can be said to exist its contours may be found in the complex and evolving concept of State aid Because approaching any

State aid issue can be fraught with multiple and sometimes conflicting interpretations an in depth analysis of the rationales initiatives and regulations that constitute the State aid system is much needed In response to this need this book provides a fine grained clarifying context through which recent reforms policy shifts and judicial decisions concerning State aid can be understood and applied to specific situations Focusing on the impacts of landmark cases and policy developments leading up to a deeply informed critique of the current State Aid Modernisation Programme the authors cover such issues and topics as the following linkages to other established and evolving EU common policies and common strategies effect of EU State aid rules in the expanding geopolitical regions of EU influence interaction with the WTO Subsidies and Countervailing Measures Agreement the problem of a subsidies culture how the European Commission s notion of bad State aid has evolved effect of EU policy imperatives e g environmental goals which implicitly argue for increased subsidisation nexus with EU tax harmonisation competition among undertakings versus competition among Member State policies and nature of the quasi devolution of regulatory responsibilities to EU Member States This book is a crucially important source of both theoretical enlightenment and practical wisdom that will greatly enhance confident progress through any legal matter involving EU State aid rules It will prove of immeasurable value to practitioners in house counsel policymakers and academics for many years to come
