in home and building automation with KNX is not found in traditional training and usually it is not as complicated as you think it is This book provides in a pleasant and clear way the necessary tools to be successful in KNX In addition to the theoretical concepts it has condensed all the practical information that escapes in most formal courses It also brings together the mistakes of many people so that you don't make them and the knowledge developed by others over the years so that you can incorporate it thus taking a shortcut to excellence Here you will also learn to create technology not only to be a consumer of it like the vast majority of people so if you ever want to be a manufacturer of products this is the best way you can take to start opening your mind Finally this book gives you a projection of the sector of home and building automation that will allow you to be at the forefront for a few more years This book gives you all the complementary technical material you can request it to me on my instagram [startupiando](#)
