**Solutions Manual for Detection Theory Applications and Digital Signal Processing** Ralph D. Hippenstiel, 2002-06  
American Book Publishing Record , 2001      **American Childhood** Anne Scott MacLeod, 1995-10-01 In this collection of fourteen essays Anne Scott MacLeod locates and describes shifts in the American concept of childhood as those changes are suggested in nearly two centuries of children's stories Most of the essays concern domestic novels for children or adolescents stories set more or less in the time of their publication Some essays also draw creatively on childhood memoirs travel writings that contain foreigners observations of American children and other studies of children's literature The topics on which MacLeod writes range from the current politicized marketplace for children's books to the reestablishment and reconfiguration of the family in recent children's fiction to the ways that literature challenges or enforces the idealization of children MacLeod sometimes considers a single author's canon as when she discusses the feminism of the Nancy Drew mystery series or the Orwellian vision of Robert Cormier At other times she looks at a variety of works within a particular period for example Jacksonian America the post World War II decade or the 1970s MacLeod also examines books that were once immensely popular but currently have no appreciable readership the Horatio Alger stories for example and finds fresh intriguing ways to view the work of such well known writers as Louisa May Alcott Beverly Cleary and Paul Zindel      **Oceans 2005, Europe** , 2005      **Fundamentals of Statistical Signal Processing** Steven M. Kay, 2013 For those involved in the design and implementation of signal processing algorithms this book strikes a balance between highly theoretical expositions and the more practical treatments covering only those approaches necessary for obtaining an optimal estimator and analyzing its performance Author Steven M Kay discusses classical estimation followed by Bayesian estimation and illustrates the theory with numerous pedagogical and real world examples Cover volume 1      **Nature** Sir Norman Lockyer, 1907

developing signal processing algorithms including mathematical modeling computer simulation and performance evaluation He links concepts to practice by presenting useful analytical results and implementations for design evaluation and testing Next he highlights specific algorithms that have stood the test of time offers realistic examples from several key application areas and introduces useful extensions Finally he guides readers through translating mathematical algorithms into MATLAB code and verifying solutions Topics covered include Step by step approach to the design of algorithms Comparing and choosing signal and noise models Performance evaluation metrics tradeoffs testing and documentation Optimal approaches using the big theorems Algorithms for estimation detection and spectral estimation Complete case studies Radar Doppler center frequency estimation magnetic signal detection and heart rate monitoring Exercises are presented throughout with full solutions This new volume is invaluable to engineers scientists and advanced students in every discipline that relies on signal processing researchers will especially appreciate its timely overview of the state of the practical art Volume III complements Dr Kay s Fundamentals of Statistical Signal Processing Volume I Estimation Theory Prentice Hall 1993 ISBN 13 978 0 13 345711 7 and Volume II Detection Theory Prentice Hall 1998 ISBN 13 978 0 13 504135 2      **Catalog of Copyright Entries.
