

Ecosystem Study Guide

1. **Ecosystems** include all of the **living (biotic)** and **nonliving (abiotic)** parts of an environment as well as the interactions among them.
 - **Ecosystems** may be **aquatic (water)** or **terrestrial (land)**.
 - Interactions may include:
 - **Producers**: obtain energy by making their own food; plants -photosynthesis
 - **Consumers**: obtain energy by consuming their food
 - **Decomposers**: get energy by breaking down dead organisms and the wastes of living things
2. **Abiotic Factors** (nonliving)
3. **Biotic Factors** (living)
4. **Terrestrial** = land ecosystems: Forest- -Desert – Grassland - Mountains
5. **Aquatic** = water ecosystems
 - **Marine Ecosystems**: the biggest ecosystems, which cover around 71% of Earth's surface and contain 97% of our planet's water.
 - Many kinds of organisms live in marine ecosystems: the brown algae, corals, dinoflagellates, phytoplankton (plant), zoo plankton (animal) sharks and much more.
 - **Freshwater Ecosystems**: covers only 0.8% of Earth's surface and contains 0.009% of the total water. Pools, lakes or ponds, streams and rivers.
 - **Wetlands**: Places in which the soil is saturated for a lengthy period of time.
 - The ecosystems are habitats to reptiles, amphibians and around 41% of the world's fish species. The faster moving turbulent waters typically contain a greater concentrations of dissolved oxygen, supporting greater biodiversity than slow moving waters in pools.
6. **The Ecosystem Hierarchy**: (smallest to largest components)
 - **Organisms**: individuals of a species
 - **Populations**: groups of organisms of the same species
 - **Communities**: the interaction of different populations; communities live within an ecosystem
 - **Ecosystem**: all of the abiotic and biotic parts of an ecosystem
 - **Biosphere**: The life supporting zone of the earth where atmosphere, hydrosphere and lithosphere meet, interact and make life possible, is known as **biosphere**.
7. **Limiting Factor**: environmental factors that limit population sizes in a particular ecosystem
8. **Limiting Factors in an Ecosystem**.
 - **Density-dependent Factors**: limiting factors that are associated with the population density and may negatively affect the population in an area
 - operate more strongly on large populations and disease
 - triggered by increases in population density (crowding)
 - **Density- independent Factors**: limiting factors that occur regardless of how large the population is and reduce the size of all populations in the area, mostly abiotic
 - weather changes
 - human activities (pollution, u. sprawl, etc)
 - natural disasters (i.e. fires)
9. **A change in an abiotic or biotic factor may**:
 - decrease the size of a population if it cannot acclimate/adapt to or migrate from the change.
 - increase the size of a population if that change enhances its ability to survive, flourish or reproduce.

The Top Books of the Year Ecosystem Study Guide With Answers The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have enthralled audiences this year. Ecosystem Study Guide With Answers : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Ecosystem Study Guide With Answers : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Popen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
