Advanced Communication and Intelligent Systems Rabindra Nath Shaw, Marcin Paprzycki, Ankush Ghosh, 2023-10-10 This book constitutes the refereed proceedings of the Second International Conference on Advanced Communication and Intelligent Systems ICACIS 2023 held in Warsaw Poland during June 16 17 2023 The 22 full papers included in this book were carefully reviewed and selected from 221 submissions They were organized in topical sections as follows Wireless Communication Artificial Intelligence and Machine Learning Robotics Automation Data Science IoT and Smart Applications

Proceedings of the International Conference on Education Research Reza Hosseini, *Artificial Intelligence in Records and Information Management* Mutsagondo, Samson, 2025-04-11 As trending and general technology of the day artificial intelligence AI has permeated every facet of life such as medicine commerce health as well as media The records management domain is no exception Records and information management benefit from AI by being relieved of many tedious processes that are may be easily subjected to manual oversight Thus through AI compliance security and efficiency in records management can be greatly enhanced

Artificial Intelligence in Records and Information Management outlines and assesses the role and contribution of AI in the records and information management domain. It establishes how records and information management can benefit from the application of artificial intelligence inclusive of all its sub technologies. Covering topics such as archival software, data governance and academic scholarship, this book is an excellent resource for records officers, records managers, information professionals, archivists, documentalists, information and communication technology (ICT) professionals, heritage managers, museologists, historians, archaeologists, media professionals, professionals, researchers, scholars, academicians and more.

Methodologies for Intelligent Systems Zbigniew Raś, Maria Zemankova, 1987 **Beyond Code** Daniel Plate, James Hutson, 2025-09-02. AI powered coding tools are revolutionizing software development, transforming programming from a specialized skill into an accessible educational practice across disciplines. This book investigates how tools such as Cursor AI, GitHub Copilot and Replit's Ghostwriter are dismantling traditional barriers to entry for learners, particularly those from non-STEM backgrounds, by enabling natural language code generation, intelligent debugging and interactive project based learning. Bridging the gap between theoretical instruction and practical application, the book serves as both a guide and a critical framework for integrating generative AI into curricula. It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing, thereby making coding relevant and actionable for students in the humanities and beyond. The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models. This resource is essential for instructors seeking to demystify coding, promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom.
