Danias, 2008-04-06 Cardiac Magnetic Resonance CMR is a rapidly evolving imaging technology and is now increasingly utilized in patient care Its advantages are noninvasiveness superb image resolutions and body tissue characterization CMR is now an essential part of both cardiology and radiology training and has become part of the examination for Board certification This book provides a condensed but comprehensive and reader friendly educational tool for cardiology fellows and radiology residents It contains multiple choice questions similar to board examinations with concise comment and explanation about the correct answer *Medical Sciences at a Glance* Jakub Scaber, Faisal Rahman, Peter Abrahams, 2014-01-15 This easy to use workbook covers all the basic sciences in clinical context and includes the full range of question types used in medical school It offers comprehensive advice on how to tackle tricky examinations how to deal with question types from SAQs to essays and will stimulate abstract skills like critical thinking and the ability to deliver the key facts Ideal for the pre clinical years and USMLE candidates *Medical Sciences at a Glance Practice Workbook* features An introductory section featuring step by step guidance on exam technique

and papers Over 390 questions of varying formats and full explanations to the answers A topic based structure reflecting vital foundation concepts including anatomy physiology pathology and pharmacology Medical Sciences at a Glance Practice Workbook meets the needs of medical students with a spectrum of educational approaches in mind Whatever your course type working through this book will give you the advantage when it comes to basic science exams [SAMT](#), 1979 **MCQs & EMQs in Human Physiology, 6th edition** Ian Roddie, William F M Wallace, 2004-05-28 There has been a marked change in examination strategy over the last five years EMQs extended matching questions are popular with tutors and students alike as they present a more realistic view of a student's ability to apply his or her knowledge in a clinical situation The new edition of MCQs in Physiology has been subject to a complete overhaul [The British National Bibliography](#) Arthur James Wells, 1979 [Multiple Choice Questions in Physiology](#) Rashmi A. Joshi, B. Jain, 2002 It is difficult to catch up with the enormously expanding field of Physiology The students who are reviewing or studying physiology for medical examination and other paramedical courses will find this book useful **Cardiovascular Physiology Concept** Hannah Ramirez, 2020-08-23 Cardiovascular Physiology Concept Short Book Description An Introduction to Cardiovascular Physiology provides the student with the key concepts of cardiovascular physiology Cardiovascular Physiology Questions for Self Assessment With Illustrated Answers Cardiovascular Physiology Concept full Book Description Overview of the cardiovascular system The cardiac cycle Cardiac myocyte excitation and contraction Initiation and nervous control of heart beat Electrocardiography and arrhythmias Control of stroke volume and cardiac output Assessment of cardiac output and peripheral pulse Haemodynamics flow pressure and resistance The endothelial cell The microcirculation and solute exchange Circulation of fluid between plasma interstitium and lymph Vascular smooth muscle excitation contraction and relaxation Control of blood vessels I Intrinsic control Control of blood vessels II Extrinsic control by nerves and hormones Specialization in individual circulations Cardiovascular receptors reflexes and central control Coordinated cardiovascular responses Cardiovascular responses in pathological situations The aim of this collection of over 230 questions is to offer students an element of self assessment as they progress through the companion book or revise for examinations Lecturers may find some of the questions useful as a template when setting questions of their own but should note that the questions are primarily educational in intent their discriminatory power has not been tested The questions are grouped under the same headings as the chapters of the companion textbook so they become progressively more advanced see Contents Occasional statements call for information from later chapters Medically relevant questions are introduced wherever they are appropriate I have set at least one question on each learning objective given at the start of the chapter in the companion volume to help you assess your achievement of the learning objectives Some questions require you to integrate information from other chapters too The questions aim to test basic understanding fundamental principles and medical relevance Hopefully they avoid excessive detail always the examiner's easy option The questions Most of the questions are multiple choice questions MCQs generally

with five true false statements but occasionally more or less than five Although some educationalists now demand single correct answer questions SAQs one correct answer out of four or five options these test less knowledge so the MCQ style has been retained here To add variety there is a sprinkling of other styles of question such as extended matching questions i e choose the best answer from a list data interpretation problems and little numerical problems that test reasoning power and ability to do simple calculations The answers Each answer is accompanied by a brief explanation and very often an illustrative figure which should help if you got the answer wrong Most of the figures are from the accompanying textbook but there are also new explanatory diagrams after some questions It is sometimes difficult to avoid ambiguity in MCQ questions so use your common sense choose the answer that will be right most of the time rather than a remote rare possibility Nevertheless if you disagree with the official answer do let me know *Distance & Supported Open Learning* ,1999
