Diagnostics Statistical Manual:

Diagnostic and Statistical Manual of Mental Disorders American Psychiatric Association, American Psychiatric Association. Work Group to Revise DSM-III., 1987 Prepared by the Work Group to Revise DSM III of the American Psychiatric Association

Diagnostic and Statistical Manual of Mental Disorders American Psychiatric Association, American Psychiatric Association. Task Force on DSM-IV., 1994 The product of a Task Force and 13 Work Groups of the American Psychiatric Association DSM IV represents the first complete change in DSM in 13 years In addition to increased clarity specificity and clinical utility it features increased emphasis on the influence of culture and ethnicity on psychiatric assessment and diagnosis increased emphasis on the role of substance use and general medical conditions in the development of psychiatric disorders and increased emphasis on how development across the life span influences the presentation and assessment of psychiatric disorders Paper edition 062 9 42 95 Annotation copyright by Book News Inc Portland OR

Diagnostic and Statistical Manual of Mental Disorders, 1998 *Diagnostic and Statistical Manual of Mental Disorders*, 2013 This is the standard reference for clinical practice in the mental health field Since a complete description of the underlying pathological processes is not possible for most mental disorders it is important to emphasize that the current diagnostic criteria are the best available description of how mental disorders are expressed and can be recognized by trained clinicians The classification of disorders is harmonized with the World Health Organization's International Classification of Diseases ICD the official coding system used in the United States The disorders included in DSM 5 were reordered into a revised organizational structure meant to stimulate new clinical perspectives This new structure corresponds with the organizational arrangement of disorders planned for ICD 11 scheduled for release in 2015 Other enhancements have been introduced to promote ease of use across all settings including Representation of developmental issues related to diagnosis Integration of scientific findings from the latest research in genetics and neuroimaging Consolidation of autistic disorder Asperger's disorder and pervasive developmental disorder into autism spectrum disorder Streamlined classification of bipolar and depressive disorders Restructuring of substance use disorders for consistency and clarity Enhanced specificity for major and mild neurocognitive disorders Transition in conceptualizing personality disorders New disorders and features Online enhancements Publisher description
