Denying Aids Conspiracy Theories Pseudoscience And Human Tragedy:

Denying AIDS Seth C. Kalichman, 2009-01-16 Paralleling the discovery of HIV and the rise of the AIDS pandemic a flock of naysayers has dedicated itself to replacing genuine knowledge with destructive misinformation and spreading from the fringe to the mainstream media and the think tank Now from the editor of the journal AIDS and Behavior comes a bold exposé of the scientific and sociopolitical forces involved in this toxic evasion Denying AIDS traces the origins of AIDS dissidents' disclaimers during the earliest days of the epidemic and delves into the psychology and politics of the current denial movement in its various incarnations Seth Kalichman focuses not on the difficult or doubting patient but on organized widespread forms of denial including the idea that HIV itself is a myth and HIV treatments are poison and the junk science faulty logic conspiracy theories and larger forces of homophobia and racism that fuel them The malignant results of AIDS denial can be seen in those individuals who refuse to be tested ignore their diagnoses or reject the treatments that could save their lives Instead of ignoring these currents asserts Kalichman science has a duty to counter them Among the topics covered Why AIDS denialism endures and why science must understand it Pioneer virus HIV researcher Peter Duesberg's role in AIDS denialism Flawed immunological virological and pharmacological pseudoscience studies that are central to texts of denialism The social conservative agenda and the politics of AIDS denial from the courts to the White House The impact of HIV misinformation on public health in South Africa Fighting fiction with reality anti denialism and the scientific community For anyone affected by interested in or working with researchers in HIV AIDS and public health professionals in general the insight and vision of Denying AIDS will inspire outrage discussion and ultimately action See <http://denyingaids.blogspot.com> for more information

Science and Anthropology in a Post-Truth World H. Sidky, 2020-11-12 At the end of 2019 Americans were living in an era of post truth characterized by fake news weaponized lies alternative facts conspiracy theories magical thinking and irrationalism While many complex interconnected factors were at work this post truth era was partly the culmination of a cadre of anthropologists and other academics in American universities and colleges during the 1980s and 1990s In Science and Anthropology in a Post Truth World H Sidky examines how their untoward dalliance with problematic and dangerous ideas by Michel Foucault Jacques Derrida Jean François Lyotard Bruno Latour and

Jean Baudrillard informed and empowered a forceful assault on science and truth in the following decades by corporate organizations politicians religious extremists and right wing populists **Faith in Fallacy** James Lawrence Powell,2024-11-08 Science and medicine have brought about many improvements in both the length and quality of human life Nevertheless at various times in history nations have rejected science in favor of pseudoscience Faith in Fallacy brings together various examples of state science denial and its consequences examining what they have in common and how they differ *Thinking Through Resistance* Nicola Bulled,2017-03-03 Thinking Through Resistance examines a diverse range of case studies of opposition to biomedical public health policies from resistance to HPV vaccinations in Texas to disputes over HIV prevention research in Malawi to assess the root causes of opposition It is argued that far from being based on ignorance resistance instead serves as a form of advocacy calling for improvements in basic health care delivery alongside expanded access to infrastructure and basic social services With contributions from medical anthropologists sociologists and public health experts the book makes important reading for researchers students and practitioners in the fields of public health medical anthropology and public policy *Trusting Science* Kostas Kampourakis,2025 Certain scientific fields have long been battlegrounds of controversy echoing a deep seated public distrust towards science This distrust is especially pronounced in areas of policy science that is science that informs policy decisions such as vaccination programs This book explores the roots of this distrust setting it apart from outright denial of science While absolute denial is rare distrust can be quite widespread often nourished by personal experiences or the persuasive testimonies of others Trusting Science embarks on a journey to uncover some underexplored causes of science distrust It thus underscores the necessity of demystifying science by illuminating the nature of scientific evidence the inevitable presence of uncertainty the indispensable role of expertise and the subtle sway of personal biases Drawing on historical examples from vaccination and other life sciences Trusting Science offers opportunities for reflection about how science is done and argues that a renaissance in science education and communication is crucial for cultivating realistic expectations and rebuilding public trust in science *Fear* Robert Peckham,2023-09-07 Extraordinary Ai Weiwei Brilliant Simon Schama Fear has long been a driving force perhaps the driving force of world history a coercive tool of power and a catalyst for radical change Here Robert Peckham traces its transformative role over a millennium from fears of famine and war to anxieties over God disease technology and financial crises In a landmark global history that ranges from the Black Death to the terror of the French Revolution the AIDS pandemic to climate change Peckham reveals how fear made us who we are and how understanding it can equip us to face the future South Africa Yearbook ,2009 **The British National Bibliography** Arthur James Wells,2009 Choice ,2009 The AIDS Conspiracy Nicoli Nattrass,2013-11-01 Since the early days of the AIDS epidemic many bizarre and dangerous hypotheses have been advanced to explain the origins of the disease In this compelling book Nicoli Nattrass explores the social and political factors prolonging the erroneous belief that the American government manufactured the

human immunodeficiency virus HIV to be used as a biological weapon as well as the myth's consequences for behavior especially within African American and black South African communities Contemporary AIDS denialism the belief that HIV is harmless and that antiretroviral drugs are the true cause of AIDS is a more insidious AIDS conspiracy theory Advocates of this position make a conspiratorial move against HIV science by implying its methods cannot be trusted and that untested alternative therapies are safer than antiretrovirals These claims are genuinely life threatening as tragically demonstrated in South Africa when the delay of antiretroviral treatment resulted in nearly 333 000 AIDS deaths and 180 000 HIV infections a tragedy of stunning proportions Nattrass identifies four symbolically powerful figures ensuring the lifespan of AIDS denialism the hero scientist dissident scientists who lend credibility to the movement the cultpreneur alternative therapists who exploit the conspiratorial move as a marketing mechanism the living icon individuals who claim to be living proof of AIDS denialism's legitimacy and the praise singer journalists who broadcast movement messages to the public Nattrass also describes how pro science activists have fought back by deploying empirical evidence and political credibility to resist AIDS conspiracy theories which is part of the crucial project to defend evidence based medicine
