Policy and the Political Life of Music Education Patrick K. Schmidt, Richard Colwell, 2017 Policy and the Political Life of Music Education is the first book of its kind in the field of Music Education. It offers a far reaching and innovative outlook bringing together expert voices who provide a multifaceted and global set of insights into a critical arena for action today: policy. On one hand, the book helps the novice to make sense of what policy is, how it functions, and how it is discussed in various parts of the world, while on the other, it offers the experienced educator a set of critically written analyses that outline the state of the play of music education policy thinking. As policy participation remains largely underexplored in music education, the book helps to clarify to teachers how policy thinking does shape educational action and directly influences the nature, extent, and impact of our programs. The goal is to help readers understand the complexities of policy and to become better skilled in how to think, speak, and act in policy terms. The book provides new ways to understand and therefore imagine policy, approximating it to the lives of educators and highlighting its importance and impact. This is an essential read for anyone interested in change and how to better understand decision making within music and education. Finally, this book, while aimed at the growth of music educators' knowledge base regarding policy, also fosters open thinking regarding policy as a subject helping educators straddling arts and education to recognize that policy thinking can offer creative designs for educational change.

*The Fifth Freedom* David Erickson, 2023-02-27 It is within our power to provide an opportunity rich childhood for all. In 1941, President Franklin Roosevelt delivered his famous Four Freedoms speech. In that speech, Roosevelt proposed that all Americans should be granted the freedom of speech, freedom of worship, freedom from want, and freedom from fear. In his new book *The Fifth Freedom*, senior vice president at the Federal Reserve Bank of New York, David Erickson makes the case for the freedom to an open future. The status quo in the United States is unfair and expensive. We spend too much on downstream consequences of people living in poverty rather than spending money on the upstream conditions that would guarantee an opportunity rich childhood for all. A strong foundation in childhood is the best predictor of a healthy and productive adulthood. A commitment to the fifth freedom would save trillions on avoided chronic disease, incarceration, educational failures, and lost productivity. *The Fifth Freedom* calls for place-based institutions that support growth and development: good schools, well-funded libraries, safe streets, and public spaces, quality health care, spiritual homes, and well-functioning transportation that puts other essential amenities in reach, especially jobs that work in concert with individual interventions, tutoring, counseling, and coaching. Not providing children with the resources they need is more expensive than reacting to the negative consequences of not having them.

GUYnecology Rene Almeling, 2020-08-25 For more than a century, the medical profession has made enormous efforts to understand and treat women's reproductive bodies. But only recently have researchers begun to ask basic questions about how men's health matters for reproductive outcomes, from miscarriage to childhood illness. What explains this gap in knowledge, and what are its consequences? Rene Almeling examines the

production circulation and reception of biomedical knowledge about men's reproductive health From a failed nineteenth century effort to launch a medical specialty called andrology to the contemporary science of paternal effects there has been a lack of attention to the importance of men's age health and exposures Analyzing historical documents media messages and qualitative interviews GUYnecology demonstrates how this non knowledge shapes reproductive politics today
