Increasing Persistence Wesley R. Habley,Jennifer L. Bloom,Steve Robbins,2012-09-04 INCREASING PERSISTENCE Of all the books addressing the puzzle of student success and persistence I found this one to be the most helpful and believe it will be extremely useful to faculty and staff attempting to promote student success The authors solidly ground their work in empirical research and do a brilliant job providing both an overview of the relevant literature as well as research based recommendations for intervention GAIL HACKETT PH D provost and executive vice chancellor for academic affairs professor counseling and educational psychology University of Missouri Kansas City Research indicates that approximately forty percent of all college students never earn a degree anywhere any time in their lives This fact has not changed since the middle of the 20th century Written for practitioners and those who lead retention and persistence initiatives at both the institutional and public policy levels Increasing Persistence offers a compendium on college student persistence that integrates concept theory and research with successful practice It is anchored by the ACT s What Works in Student Retention WWISR survey of 1 100 colleges and universities an important resource that contains insights on the causes of attrition and identifies retention interventions that are most likely to enhance student persistence The authors focus on three essential conditions for student success students must learn students must be motivated committed engaged and self regulating and students must connect with educational programs consistent with their interests and abilities The authors offer a detailed discussion of the four interventions that research shows are the most effective for helping students persist and succeed assessment and course placement developmental education initiatives academic advising and student transition programming Finally they urge broadening the current retention construct providing guidance to policy makers campus leaders and individuals on the contributions they can make to student success

**Catalog** Pikes Peak Community College,2016 *Bridging the Gaps* James E. Rosenbaum,Caitlin E. Ahearn,Janet E. Rosenbaum,Janet Rosenbaum,2017-09-02 College for all has become the new American dream Most high school students today express a desire to attend college and 90% of on time high school graduates enroll in higher education in the eight years following high school Yet degree completion rates remain low for non traditional students students who are older low

income or have poor academic achievement even at community colleges that endeavor to serve them What can colleges do to reduce dropouts In *Bridging the Gaps* education scholars James Rosenbaum Caitlin Ahearn and Janet Rosenbaum argue that when institutions focus only on bachelor s degrees and traditional college procedures they ignore other pathways to educational and career success Using multiple longitudinal studies the authors evaluate the shortcomings and successes of community colleges and investigate how these institutions can promote alternatives to BAs and traditional college procedures to increase graduation rates and improve job payoffs The authors find that sub baccalaureate credentials associate degrees and college certificates can improve employment outcomes Young adults who complete these credentials have higher employment rates earnings autonomy career opportunities and job satisfaction than those who enroll but do not complete credentials Sub BA credentials can be completed at community college in less time than bachelor s degrees making them an affordable option for many low income students *Bridging the Gaps* shows that when community colleges overemphasize bachelor s degrees they tend to funnel resources into remedial programs and try to get low performing students on track for a BA Yet remedial programs have inconsistent success rates and can create unrealistic expectations leading struggling students to drop out before completing any degree The authors show that colleges can devise procedures that reduce remedial placements and help students discover unseen abilities attain valued credentials get good jobs and progress on degree ladders to higher credentials To turn college for all into a reality community college students must be aware of their multiple credential and career options *Bridging the Gaps* shows how colleges can create new pathways for non traditional students to achieve success in their schooling and careers
