WAIMH Handbook of Infant and Early Childhood

Mental Health Joy D. Osofsky, Hiram E. Fitzgerald, Miri Keren, Kaija Puura, 2024-02-19 This book examines basic knowledge in the field of infant and early childhood mental health. It focuses on cognitive, social, and emotional development of infants and toddlers and examines different aspects of neurobiological development including genes and epigenetics as well as biobehavioral synchrony. In addition, the book addresses parenting and caregiving issues including attachment, parent-infant relationships, and high-risk factors, e.g., the effects of trauma on the infant-caregiver relationship, adolescent parenting, and parents with substance abuse disorders. Key areas of coverage include: Social, emotional, and cognitive development during infancy and early childhood; Temperament in infants and toddlers; Neurobiological influences from infancy through early childhood; Parenting and caregiving of infants and toddlers; Reflective functioning, mentalization, and infant development. The WAIMH Handbook of Infant and Early Childhood Mental Health, Volume One, is a must-have reference for researchers, professors, and graduate students as well as clinicians and all related therapists and professionals in infancy and early child development, developmental psychology, pediatrics, child and adolescent psychiatry, clinical social work, public health, and all related disciplines.

Infant and Early Childhood Mental Health Kristie Brandt, Bruce D. Perry, Stephen Seligman, Ed Tronick, 2014-10-03 *Infant and Early Childhood Mental Health: Core Concepts and Clinical Practice* is a groundbreaking book that provides an overview of the field from both theoretical and clinical viewpoints. The editors and chapter authors, some of the field's foremost researchers and teachers, describe from their diverse perspectives key concepts fundamental to infant, parent, and early childhood mental health work. The complexity of this emerging field demands an interdisciplinary approach, and the book provides a clear, comprehensive, and coherent text with an abundance of clinical applications to increase understanding and help the reader to integrate the concepts into clinical practice. Offering both cutting-edge coverage and a format that facilitates learning, the book boasts the following features and content: A focus on helping working professionals expand their specialization skills and knowledge and on offering core competency training for those entering the field, which reflects the Infant-Parent Mental Health Postgraduate Certificate Program, IPMHPCP, and Fellowship in Napa, CA, that was the genesis of the book; Chapters written by a diverse group of authors with vastly different training, expertise, and clinical experience, underscoring the book's interdisciplinary approach; In addition, terms such as clinician, therapist, provider, professional, and teacher are intentionally used interchangeably to describe and unify the field; Explication and analysis of a variety of therapeutic models, including Perry's Neurosequential Model of Therapeutics, Brazelton's neurodevelopmental and relational Touchpoints, attachment theory, the Neurorelational Framework, Mindsight, and Downing's Video Intervention Therapy. An entire chapter devoted to diagnostic schemas for children ages 0-5, which highlights the Diagnostic Classification of Mental Health Disorders of Infancy and Early Childhood, Revised (DC:0-3R). With the release of DSM-5, this chapter provides

a prototypical crosswalk between DC 0 3R and ICD codes A discussion of the difference between evidence based treatments and evidence based practices in the field along with valuable information on randomized controlled trials a research standard that while often not feasible or ethically permissible in infant mental health work remains a standard applied to the field Key points and references at the end of each chapter and generous use of figures tables and other resources to enhance learning The volume editors and authors are passionate about the pressing need for further research and the acquisition and application of new knowledge to support the health and well being of individuals families and communities Infant and Early Childhood Mental Health Core Concepts and Clinical Practice should find a receptive audience for this critically important message
