Enterprise GIS John R. Woodard, 2020-01-24 This book defines and discusses how the field of Enterprise Architecture EA can be incorporated into the design of Enterprise Geographic Information Systems EGIS. The objective of EA is to develop a strategic plan that structures an organization's resources data information people and assets into one team that works together to achieve the company's objectives in an efficient agile and adaptable way. It demonstrates how EA concepts can be incorporated within EGIS by improving the system's efficiency and reliability. Through real world examples and step by step

explanations the reader will reach a comfortable understanding of the theories and methods discussed in the book The Future of the Professions Richard E. Susskind, Daniel Susskind, 2015 This book predicts the decline of today's professions and describes the people and systems that will replace them In an Internet society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable systems from telepresence to artificial intelligence will bring fundamental change in the way that the practical expertise of specialists is made available in society The authors challenge the grand bargain the arrangement that grants various monopolies to today's professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose six new models for producing and distributing expertise in society The book raises important practical and moral questions In an era when machines can outperform human beings at most tasks what are the prospects for employment who should own and control online expertise and what tasks should be reserved exclusively for people Based on the authors in depth research of more than ten professions and illustrated by numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century
