**Incubators and Chicken Rearing Appliances**, 1906 What parts of a start-up's business model are influenced by incubators? Moritz Krönig, 2014-11-20 Seminar paper from the year 2014 in the subject Business economics General grade 1.7 Technical University of Munich TUM School of Management language English abstract Incubators and their influence on start ups as well as their performance are widely discussed especially in Germany where Berlin and Munich are developing a very supportive environment for start ups There is a variety of different types of incubators and offered services Some work for profit others work non profit and receive governmental support For a start up the decision which incubator to choose or apply for a development program depends on its business model and the parts of it that need further adjustment Does a start up for example need capital Does it require a lab to conduct experiments Does it need entrepreneurial education All those questions influence the decision for the right incubator type There has been some research done compiling the services offered by incubators in general Aerts Matthysens Al Mubarak European Commission Enterprise Directorate General 2002 Rice 2002 Sang Suk Grimaldi von Zedtwitz Grimaldi 2006 but there is almost no literature comparing the influence on a start up's business model of different types of incubators In this work I want to reveal differences in influence on a start up's business model in Germany between university sponsored incubators and independent incubators as they are the most distinguishable types of incubators University sponsored incubators mostly belong to governmental institution and are non profit oriented whereas independent private incubators do not belong to any institution and aim to make a profit This work should help distinguish university sponsored and independent incubators regarding their influence on a business model First I want to compile the results of existing literature and in a second step challenge those results with qualitative interviews Therefore I conducted interviews with one university sponsored and one independent incubator Providing a clear view on the

differences in influence can help start ups decide which incubator type to chose
