own imaginative patterns More than fifty interviews with figures ranging from Jessica Mitford to Aaron Copland along with excerpts from the diaries letters and autobiographies of such gifted giants as Leo Tolstoy Marie Curie and Diego Rivera among others provide illuminating insights into creative activity We read for example of Darwin s preoccupation with the image of nature as a branched tree while working on his concept of evolution Mozart testifies to the vital influence on his mature art of the wondrous bag of memories he retained from childhood Anais Nin describes her sense of words as oppressive explaining how imagistic free association freed her as a writer Adding these personal accounts to laboratory studies of thought process John Steiner takes a refreshingly holistic approach to the question of creativity What emerges is an intriguing demonstration of how specific sociocultural circumstances interact with certain personality traits to encourage the creative mind Among the topics examined here are the importance of childhood mentor figures the lengthy apprenticeship of the talented person and the development of self expression through highly individualistic languages whether in images movement or inner speech Now with a new introduction this award winning book provides an uniquely broad based study of the origins development and fruits of human inspiration
