Qualitative Research Methods in Education and Educational Technology Jerry W. Willis, 2008-10-01 Qualitative Research Methods in Education and Educational Technology was written for students and scholars interested in exploring the many qualitative methods developed over the last 50 years in the social sciences. The book does not stop however at the boundaries of the social sciences. Social scientists now consume and use research methods from many fields. The rich resources of research methods and theories from both the humanities and philosophy are also covered in this book. It explains why postpositivist quantitative research should not be the only game in town and provides solid theoretical foundations beginning with the positions of Plato and Aristotle for broadening our horizons about what warrants our attention. Using Aristotle's concept of phronesis, the author shows why methods such as narrative research and storytelling, hermeneutic inquiry, literary theory, philosophical inquiry, and much more have important applications in education and educational technology. On those foundations, the author also builds a framework for doing many types of research from participatory action research to content analysis to postmodern case studies to empowerment research and philosophical inquiry. He accomplishes this through a combination of original text summaries of exemplary research in education and educational technology and suggested readings that are annotated and introduced at the end of each chapter. Many of these readings are available online and they extend the discussion of research methods or serve as exemplars of a particular type of educational technology research. There are open-ended and conceptual questions for each reading, and developing your own answers to them is one way you can extend your depth of understanding about qualitative research methods in education and educational technology.

White Magic Lothar Müller, 2015-02-02 Paper is older than the printing press and even in its unprinted state it was the great network medium behind the emergence of modern civilization In the shape of bills banknotes and accounting books it was indispensable to the economy As forms and files it was essential to bureaucracy As letters it became the setting for the invention of the modern soul and as newsprint it became a stage for politics In this brilliant new book Lothar Müller describes how paper made its way from China through the Arab world to Europe where it permeated everyday life in a variety of formats from the thirteenth century onwards and how the paper technology revolution of the nineteenth century paved the way for the creation of the modern daily press His key witnesses are the works of Rabelais and Grimmelshausen Balzac and Herman Melville James Joyce and Paul Valéry Müller writes not only about books however he also writes about pamphlets playing cards papercutting and legal pads We think we understand the Gutenberg era but we can understand it better when we explore the world that underpinned it the paper age Today with the proliferation of digital devices paper may seem to be a residue of the past but Müller shows that the humble technology of paper is in many ways the most fundamental medium of the modern world
