Differential Equations, Student Resource Manual Robert L. Borrelli, Courtney S. Coleman, 1997-11-26. The Authors' goal is to communicate an exciting new approach to Differential Equations through Modeling, Visualization, and Dynamical Systems. This new way of looking at ODEs blends the tried and true analytical methods with mathematical modeling applications to engineering and the sciences and geometric visualization via numerical solvers. The resulting rich insight and highly motivated learning offers students a powerful, stimulating yet accessible experience that brings them to a deep understanding of ODEs.

Modeling Biology Manfred Dietrich, Laubichler, Gerd B. Müller, 2007. Experts examine new modeling strategies for the interpretation of biological data and their integration into the conceptual framework of theoretical biology, detailing approaches that focus on morphology, development, behavior, or evolution. Abstract and conceptual models have become an indispensable tool for analyzing the flood of highly detailed empirical data generated in recent years by advanced techniques in the biosciences. Scientists are developing new modeling strategies for analyzing data, integrating results into the conceptual framework of theoretical biology, and formulating new hypotheses. In Modeling Biology, leading scholars investigate new modeling strategies in the domains of morphology, development, behavior, and evolution. The emphasis on models in the biological sciences has been accompanied by a new focus on conceptual issues and a more complex understanding of epistemological concepts. Contributors to Modeling Biology discuss models and modeling strategies from the perspectives of philosophy, history, and applied mathematics. Individual chapters discuss specific approaches to modeling in such domains as biological form, development, and behavior. Finally, the book addresses the modeling of these properties in the context of evolution, with a particular emphasis on the emerging field of evolutionary developmental biology, or evo devo.
