The digital frequency meter are used to measure frequency of supply in electrical circuit.

The digital frequency meter is a very useful equipment for the measurement of frequency of electrical pulses. Any event in the real world that can be converted into electrical pulses can be counted with such an equipment.

This can be used for counting the number of objects moving along an assembly line or the number of tablets to be put into a vial, or for the measurement of speed of engines, wind speed, distance, rate of flow, of fluids, etc.
