

Back-UPS[®]-CS 350/500/650 User's Manual

990-6237 3/04

Installation

1 Placement / Power

Always place the Back-UPS in:

- Direct sunlight
- Excessive heat
- Excessive humidity or in contact with fluids of any type

Plug the Back-UPS into a wall outlet, as shown.

Your computer's power cord.

- The Back-UPS charges the internal battery any time it is connected to a wall outlet.

2 Connect Equipment to the Back-UPS

The rear panel of the Back-UPS consists of the following elements:

Battery Back Up Outlets (up to 2). These outlets provide Battery Back-up, surge protection, and Electro-Magnetic Interference (EMI) filtering. In the case of power outage, battery power is automatically provided to these outlets. Power quality or battery is not supplied to these outlets when the Back-UPS is switched Off. Connect a computer, monitor, and external disk or CD-ROM drive to these outlets.

Surge Only Outlet. This outlet is always On. It does not provide battery back-up and is not controlled by the On/Off switch. This outlet does not provide power during a power outage. Connect a printer, fax, modulator or router to this outlet.

3 Connect the Phone Line to Surge Protection

The telephone ports provide lightning surge protection for any device connected to the telephone line (computer, modem, fax, or telephone). The telephone ports are compatible with Home PhoneLine Networking (HPLN), ISDN, and Digital Subscriber Line (DSL) standards, as well as all standard data rates. Connect as shown.

4 Switch on the Back-UPS

NOTE: Allow the Back-UPS to charge for a full night before use. Press the push-button on the front panel of the Back-UPS.

Observe that the following events occur after pressing and releasing the push-button:

- The green **On-Line** indicator flashes.
- The yellow **On-Battery** indicator lights while the Self-Test is being performed.
- When Self-Test has successfully completed, only the green **On-Line** indicator will be lit.
- If the internal battery is not connected, test Step 1 above; the green **On-Line** indicator and red **Replace Battery** indicator will light. The Back-UPS will also emit a chirping sound.

5 Connect USB Cable and Install Software (optional)

Push the button.

NOTE: Macintosh Users - For full USB performance, use Mac OS 10.1.5 or higher.

If Autoplay is not enabled on the computer, proceed as follows:

1. On the computer display of the display, double-click on My Computer.
2. Double-click on the CD-ROM drive icon and follow the on-screen instructions.

Status Indicators and Alarms

There are four status indicators (lighted on the front panel of the Back-UPS): On-Line, On-Battery, Overload, and Replace Battery.

On-Line (green) - is lit whenever utility power is powering the Battery Backup outlets.

On-Battery (yellow) - is lit whenever the battery of the Back-UPS is powering equipment connected to the Battery Backup Outlets.

Four Beeps Every 30 Seconds - this alarm is sounded whenever the Back-UPS is running On-Battery. Consider saving work in progress.

Continuous Beeping - this alarm is sounded whenever a low battery condition is reached. Battery run-time is very low. Promptly save any work in progress and exit all open applications. Shutdown the operating system, computer and the Back-UPS.

Overload (red) - is lit whenever power demand has exceeded the capacity of the Back-UPS.

Continuous Tone - this alarm is sounded whenever the Battery Backup outlets are overloaded.

Circuit Breaker - the circuit breaker button located on the rear panel of the Back-UPS will shut out if an overload condition forces the Back-UPS to disconnect itself from utility power. If the button sticks out, disconnect non-essential equipment. Reset the circuit breaker by pushing the button inward.

Replace Battery (red) - is lit whenever the battery is near the end of its useful life, or if the battery is not connected (see above). A battery that is near the end of its useful life has insufficient run-time and should be replaced.

Chirps for 1 Minute Every 5 Minutes - this alarm is sounded whenever the battery has failed the automatic diagnostic test.

Replace the Internal Battery

To replace the internal battery, proceed as follows:

NOTE: Replacing the battery is a safe procedure. However, small sparks may occur during the process. This is normal.

Place the unit on its side. Slide the battery compartment cover upward and off of the UPS.

Pull the battery out, exposing the battery compartment and wires. Disconnect the wires from the terminals.

Slide the new battery into the battery compartment. Connect the battery wires to the terminals as follows:
Black wire to Ground (-) terminal
Red wire to Positive (+) terminal

Align the battery compartment cover with the grooves in the UPS. Slide the cover down until it locks.

Order Replacement Battery

The typical battery lifetime is 3-6 years (depending on the number of discharge cycles and operating temperature). A replacement battery can be ordered over the phone from APC, or the battery can be ordered on-line from the APC web site (<http://www.apc.com>), or a battery can be ordered on-line from the APC web site (<http://www.apc.com>), or a battery can be ordered on-line from the APC web site (<http://www.apc.com>).

When ordering, please specify Battery Cartridge RBC2 (Back-UPS 350/500) or RBC17 (Back-UPS 650).

Transfer Voltage and Sensitivity Adjustment (optional)

In situations where the Back-UPS or connected equipment appears less sensitive to input voltage, it may be necessary to adjust the sensitivity setting. This is a single task requiring use of the front panel pushbutton. To adjust the transfer voltage, proceed as follows:

1. Plug the Back-UPS into the utility power source. The Back-UPS will be in a Standby Mode (no indicators lit).
2. Press the front panel pushbutton for 10 seconds. All indicators on the Back-UPS will flash to acknowledge going into Programming Mode.
3. The Back-UPS will then indicate its current Sensitivity Setting, as shown in the following table:

Indicators Flashing	Sensitivity Setting	Input Voltage Range (for utility operation)	Use When
1 (yellow)	Low	100 - 275 VAC	Input voltage is extremely low or high. Not recommended for computer loads.
2 (yellow, and red)	Medium (factory default)	100 - 265 VAC	Back-UPS frequently goes On-Battery.
3 (yellow, red, and red)	High	100 - 250 VAC	Connected equipment is sensitive to voltage fluctuations (recommended).

4. To select the Low Sensitivity setting, press the pushbutton until the yellow indicator is flashing.
5. To select the Medium Sensitivity setting, press the pushbutton until the yellow and red indicators (second and third from the top) are flashing.
6. To select the High Sensitivity setting, press the pushbutton until yellow and both red indicators (bottom three) are flashing.
7. To exit without changing the Sensitivity Setting, press the pushbutton until the green indicator is flashing.
8. Once in Programming Mode, if the pushbutton is not pressed within 5 seconds, the Back-UPS will exit Programming Mode; all indicators will extinguish.
