

TECHNICAL ANALYSIS AND EFFICIENT MARKET HYPOTHESIS

A COMPREHENSIVE OVERVIEW

INTRODUCTION TO TECHNICAL ANALYSIS

- Technical analysis is a method of forecasting future price movements of securities by analyzing historical market data, primarily price and volume.

Key Focus:

- **Price Movements:** Technical analysts use historical price data to identify trends and patterns.
- **Volume:** The volume of trades provides additional context for understanding price movements.

Goal: The main goal of technical analysis is to predict future price movements based on historical data, assisting in making informed investment decisions.

Sascha Kurth, 2011-10-24 Seminar paper from the year 2011 in the subject Business economics Investment and Finance grade 1.0 University of Hull course Current Issues Financial Management language English abstract The study examines and critical reviews the literature for the different implications based on the three levels of the Efficient Market Hypothesis for investors and company managers If the weak form of the EMH holds the technical analysis is useless but ninety percent of

traders in London are using it If the semi strong form holds the fundamental analysis study of published accounts search for undervalued companies are useless and investors should be focus on diversification and avoiding of transaction costs Furthermore the semi strong form would imply for managers that accounting disclosure to deceived shareholders is useless the company market value is the best indicator for the company value and management decisions the company does not need specialists for the timing of issues and there are no opportunities for a cheap acquisition of another company At least if the strong form of the EMH holds it would imply that even with insider information it would not be possible to get above average returns The literature shows that the studies of EMH have made an important contribution to our understanding of the security market It also shows that in some cases scientific results do not strong influence the behaviour of manager and investors in the real world
