Julii Markgraf, 2004-03-02 Seminar paper from the year 2003 in the subject Law Media Multimedia Law Copyright grade 62 % Bond University Australia Law School course Intellectual Property language English abstract Following up the last mentioned development the copyright of DVD s and the protective sanctions which the copyright owners of the film industry imposed will be the central focus of the assignment However the paper will not address the issue of downloading film data from the Internet For the purpose of that paper the question of backing up purchased DVD s will be the major focus Under the Copyright Act 1968 Cth film is defined under secondary work In order to distinguish works from secondary works the Copyright Act 1968 defines protection of forms of expression that are artistic literary dramatic and musical items 4 as works whereas mechanical rights such as films sound recordings television broadcasts and published editions 5 are defined as secondary work The reason for that differentiation is that secondary work is generally based on a work However the copyrights exist independent of each other simultaneously 6 Furthermore film is defined as the aggregate of visual images capable of being shown as a moving picture including the soundtrack 7 This also includes movies which are made by computer animation such as Finding Nemo for example Moreover even interactive video games fall under the definition of film since the decision of Saga Enterprises LTD v Galaxy Electronics Pty Ltd 1997 147 ALR 2 However the paper will not deal with cinematographic films defined under that case interactive games but will only focus on movies in a classical understanding As previously mentioned the film industry developed several protective strategies which were supposed to

resist against copyright piracy However the copyright owners had to face several bitter discomfitures A 15 year old Norwegian used basic mathematic formulas and cracked the protective code New high tech technology offers devices for easy DVD copying of already purchased products The segmentation of the market in several area codes is facing the test of the infringement of competition law Also subject to the question of competition law was the question dealt with in the Australian case Australian Video Retailers Association Ltd v Warner Home Video Pty Ltd 2001 FCA 1719 where Australian Video Retailers refused to accept the Warners approach of introducing two different DVD types on the market one for retail and one for rental 4 Quirk P Forder J Electronic Commerce and The Law p 181 5 s above p 181 6 s above p 181 7 s above p
