Chapter 01 Modern Supervision Concepts And Skills:

Supervision Samuel C. Certo, 2003 Certo's SUPERVISION prepares students to be supervisors. It is based on the premise that organizational variables like the nature of the workforce, computer and communication technology and the design of organization structures are changing perhaps more rapidly than at any other time in history. All of these factors have a direct influence on supervisors' roles.

Administering Instructional Media Programs Carlton W. H. Erickson, 1968 A Guide to Medical Teaching and Learning Training of the Trainers (Tot) Dr. Abdullah Dukhail Al-Khatami, 2018-07-27 This book helps medical teachers and students develop the best approach to ensure a high level of learning achievement. Dr. Abdullah Dukhail Al-Khatami begins by outlining the traditional learning model and how it differs from the learner-centered model. He argues that we must recognize the ineffectiveness of how we've taught medical students in the past. The best way to achieve learning, he says, is to encourage learning skills and collaboration learning between the learners and their supervisors through the supervision meeting assessment to identify their learning gap, achievement process and achievement assessment. Instead of focusing on surface learning or memorization, learner-centered learning connects current learning to past experiences. That leads to deep learning and helps learners organize information. This newer approach leverages small groups to further the learning process. Feedback, reflection and work-based assessments measure achievements. By following the models' best practices, you'll be able to prepare trainees to succeed in the field, manage your time more efficiently, encourage appropriate communication skills and professionalism and convince trainees that goals are achievable. Filled with checklists, summaries, graphs, exercises and additional resources, this is a must-have guide for anyone serious about medical education.

Psychiatric Nursing Skills Graham Dexter, Michael Wash, 2013-12-01 In this book we have attempted to identify skills which are needed by the psychiatric nurse and in doing so to identify a body of knowledge unique to the professional psychiatric nurse. The book has been written to demonstrate the basis of a skills approach for both the experienced and the inexperienced nurse to build upon for we believe that psychiatric nurses due to both their training and their particular mixture of interests are well equipped to be in the forefront of psychiatry as a developing art and science. We hope that this book in some small way helps this development. Some of the more recent advances in psychiatric nursing have been reinforced by the publication of a training syllabus for mental nurses English and Welsh National Boards 1982. This document highlights the need for a change from a medical model to a social model and from a task-oriented learning experience to a skills approach. We have attempted to reflect this change in emphasis by including such aspects as personal development and self-awareness, human sexuality, the nursing process and counselling skills.

Managing Modern Youth Work Liz Hoggarth, Bryan Merton, Mary Tyler, 2009-09-24 When people set out to qualify in youth work they do not anticipate that it's about managing themselves, aims, intentions and outcomes, programmes and projects, case work, educational experiences and environments, budgets, volunteers and staff and young people's development. This book ensures that students

will feel confident to manage purpose projects and people to deliver good quality educational and developmental youth work with and for young people It also caters for those with youth work management experience by providing an opportunity to review and further develop management skills and understanding in the context of a volatile policy environment *Modern Management* Samuel C.
