

## **OBJECTIVE:**

- The main of this system is to provide uninterruptable for single phase loads even in the failure of one or two phases in a three phase system.

## **INTRODUCTION:**

- Power instability in developing countries creates the need for automation of phase selection or alternative sources of power to back-up the utility supply.
- If any one or two phases in a three phase supply interrupted or goes low and you want the equipment to work on normal voltages then this circuit will give you the solution.
- This system is designed to monitor the presence of supply to the three phase and to display the condition of each phase on an LCD.
- Most industrial and commercial applications depends upon the power supply.
