Driving Green Transportation System Through Artificial Intelligence and Automation Alex Khang, 2025-01-11 This book is designed to help transportation professionals and construction experts to develop and implement successful smart systems leveraging the current trends equipment and advanced technologies to drive the green transportation system development Artificial intelligence AI is a new direction that has opened a revolution in technology and smart applications and it is also the basis for creating a green environment in the net zero era Therefore machines devices self driving car and robots controlled by artificial intelligence based systems are now the model of a smart transportation ecosystem for which all these technologies are referred to as green industries In past years the idea of making a green environment has been existing and moving on the society 5.0 being as a country strategy and today AI technology continues its development on this prototype Nowadays AI has begun actions to resemble a person in a real sense and the idea of human liked robotics put forward by scientists has started to be realized and will probably complete its development as living machines in the near future AI has many subsystems and application in various industries some of which have automation more accurately and are more integrated in modern industries This book also targets a mixed audience of specialists analysts engineers scholars researchers academics professionals and students from different communities to share and contribute new ideas methodologies technologies approaches models frameworks theories and practices to resolve the challenging issues associated with the leveraging of AI and Industrial Internet of Things IIoT in green transportation ecosystem *Proceedings of the Fifth International Conference on Intelligent Systems and Networks* Nguyen Thi Dieu Linh, Shiqi Yu, Ali Selamat, Duc

-Tan Tran,2025-11-12 This book includes peer reviewed articles from the Fifth International Conference on Intelligent Systems and Networks ICISN 2025 held at Hanoi in Vietnam It presents latest research outcomes and results of cutting edge work reported by the authors which are very useful for the researchers and industry practitioners The scope of the proceedings include but not limited to Foundations of Computer Science Computational Intelligence Language and Speech Processing Software Engineering and Software Development Methods Wireless Communications Signal Processing for Communications Next Generation Mobile Networks Internet of Things and Sensor Systems etc We believe that selected manuscripts will be of great value as references for these emerging areas of research Connected Objects, Artificial

Intelligence, Telecommunications and Electronics Engineering Youssef Mejdoub,Abdelkebir Elamri,Mustapha Kardouchi,2025 This book presents recent advances on connected objects systems telecommunications artificial intelligence and electronic engineering On the connected objects side the proceedings covered advancements in areas like sensor miniaturization and networking to enable ever more ubiquitous and autonomous IoT deployments The AI focused contributions explored novel machine learning architectures and training techniques tailored for resource constrained edge devices Key breakthroughs included federated learning models In the telecommunications realm the proceedings examined the critical role of 5G 6G and satellite communications in providing the high bandwidth low latency connectivity required to unlock the full potential of AI powered connected systems This book is a collection of high quality research papers presented at the 3rd International Conference on Connected Objects and Artificial Intelligence COCIA 2025 held at High School of Technology Hassan II University Casablanca Morocco during April 16 18 2025 This book features cutting edge research and insights at the intersection of the important technology domains connected objects systems telecommunications artificial intelligence and electronic engineering It is designed for researchers academicians professionals and graduates seeking to deepen their understanding and expertise at the intersection of IoT AI telecommunications and electronic engineering

Transportation Sensors and Controls Society of Photo-optical Instrumentation Engineers,1997 **Demonstration of Video-based Technology for Automation of Traffic Data Collection** Michael C. Pietrzyk,1996 *Implementing Congestion Charges* ,2010 Recent advances in the scientific understanding of urban traffic congestion have only strengthened the already solid case for congestion charges as an element of a successful urban transport policy but examples of real world congestion charging systems remain few and far between What can be done to improve the chances of their more widespread adoption in practice This report draws lessons from attempts to introduce congestion charges Technology is not an obstacle and technologies should serve policy purposes instead of define them Charging systems are not cheap and thus should only be used where congestion is severe Public acceptance is seen to be the key to successful implementation Although environmental benefits and careful deployment of toll revenues may improve acceptance a charging system should never lose sight of its principal aim which is to reduce congestion Publisher s description **Video Enforcement for HOV**

Lanes Shawn Turner,1998 This report documents a study conducted to assess and test promising technologies for HOV lane enforcement After a qualitative assessment of video automatic vehicle identification and infrared machine vision technologies the study was suspended because no preferred infrared technology was available for testing The study was resumed when a vendor demonstrated promising video technology The highoccupancy vehicle enforcement and review HOVER system was then developed for an operational test on the East R L Thornton I 30 contraflow HOV lane in Dallas Texas The results of the operational test indicated that the HOVER system in its current state could support a program that mails HOV information to suspected violators similar to the HERO program The study s limited budget prevented several improvements that could improve the capabilities of the HOVER system With several enhancements to the system e g improved license plate recognition and whitelist license plate database etc the HOVER system could be used to perform enforcement screening Significant enhancements to the system e g high quality video cameras and additional camera views improved video signal transmission improved license plate capture and recognition etc could enable its use for HOV ticket by mail programs although enabling legislation does not currently exist in Texas The author recommends implementation of these enhancements and further testing to determine future system potential

The Top Books of the Year Automatic License Plate Recognition System Manual The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have enthralled audiences this year. Automatic License Plate Recognition System Manual : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
