

## ENGINE TIMING AND TUNE-UPS

Proper ignition timing is critical in order to achieve peak engine performance and to ensure maximum fuel economy. An ignition system timing check is critical during any tune-up procedure. Your timing light provides a simple and efficient means of checking your vehicle's timing. The advance timing light provides the additional ability to check the operation of your vehicle's mechanical or vacuum advance timing controls.

You may also need tools and equipment to check engine rpm, breaker point dwell (for conventional ignition systems), or to apply vacuum to the vacuum advance diaphragm on the distributor during advance checks. Your supplier offers a wide range of tools and equipment necessary to perform these tasks.

With reference to today's "self-tuning" vehicles, the meaning of the term "tune-up" has changed significantly. A tune-up consists essentially of checking engine operation with Original Equipment Manufacturer's specifications. Adjustments are made and parts are replaced **ONLY** if engine performance is not within specifications.

## ABOUT THE TIMING LIGHT

Your timing light is designed for use on all 12-volt negative ground vehicles equipped with conventional breaker point, and electronic ignition systems or with DIS (distributorless ignition systems). (DIS - Model 3551 **ONLY**)

### NOTE

Some DIS systems are not adjustable. Consult your vehicle's service manual for procedures and specifications before attempting to time vehicles with DIS systems.

### For 6-Volt Electrical Systems

- Requires a separate 12-volt automotive battery.

Your timing light may be used on vehicles with 6-volt electrical systems by using the following connection procedure:

1. Connect the **RED** battery clip to the positive (+) terminal of the 12-volt battery.
2. Connect the **BLACK** battery clip to the negative (-) terminal of the 12-volt battery.
3. Using a length of 18AWG jumper wire, ground the negative (-) terminal of the 12-volt battery to a known-good ground on the vehicle under test.
4. Perform remaining connection and test procedures as specified in the appropriate sections of this manual.

### Timing Light Controls

General controls for the Timing Light are shown in Figure 1.
