Transactional Agents Khaled Nagi,2003-06-30 The term agent is one of those catchwords that mean widely differing things to different people To telecommunications people it is little more than a mobile piece of code that may be executed at any place At the other extreme AI people often associate with agents human like traits such as social behavior In between software people view agents as fairly self contained pieces of software that at the low end pretty much act like objects and at the high end more or less automatically decide when and how to react to stimuli or proactively initiate effects that can be observed from their environment Software agents are particularly important when it comes to distributed environments There much of the communication takes place asynchronously that is the sequence of events cannot be planned ahead in all detail Instead agents are given rules as to how to interpret the current situation and given a common goal so that they adjust their response accordingly

International machine tool design research conference. Sixte,1976 Advances in Machine Tool Design and Research ,1976 Proceedings ,1994 **New Forces at Work in Mining** D. J. Peterson,Tom LaTourrette,James T. Bartis,2001 Over the past century technology advances have had major impacts on mining practices and the nature of the mine and quarry sites in the United States The evolution of current technologies as well as the introduction of innovations will continue and perhaps accelerate in the new century Several industry objectives will drive future technology change including lowering production costs enhancing the productivity of workers and

equipment opening up new reserves and extending the life of existing ore bodies Continuing to meet regulatory and stakeholder requirements in areas such as health and safety environmental impacts and land use Between March and July 2000 the RAND Science and Technology Policy Institute conducted a series of in depth confidential discussions with key members of the mining community to elicit a wide range of views on technology trends in all sectors of the U S mining and quarrying industry The discussions included 58 organizations engaged in coal metals aggregates and industrial minerals production as well as technology providers and research institutions This report brings to light those technologies viewed by industry leaders as critical to the success of the industry currently and critical technologies likely to be implemented between now and 2020
