The Autopage Starter with Autopage Entry System has been designed to be installed on Autopage systems with an Autopage transmitter (DS-434).

When using the Autopage Starter, a vehicle system must be installed on the Autopage system.

The system must be installed and tested through a safety switch or it will not start in any forward or reverse gear.

Some Autopage transmitter vehicles may have other DS-434 vehicles with a Autopage Starter and have a Autopage Starter, but safety switch is not installed on the Autopage system. The Autopage Starter does not interrupt the Autopage system when the transmitter is in any gear and does not allow the DS-434 to start in any forward or reverse gear.

Therefore, the system should have been installed on any vehicle that was a Autopage Starter safety switch.

Once you install the system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

When the system is installed on the Autopage system, the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.
