If you are not sure of the installation any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief outline for professional installers that are familiar with the installation and operation of the security system. Please test all of your equipment to insure proper operation of the vehicle system returning to the customer.

The Autopage Starter with Remote Entry System has been designed to be installed on Transponder systems with an external transmitter (DS-434).

When using the vehicle system as a vehicle immobilization system.

The system must be installed and tested through a safety switch as it will not start in any forward or reverse gear.

Some automatic transponder vehicles having other DS-434 vehicles with a remote starter may have a mechanical key lock safety switch instead of electrical safety switch. The mechanical key lock may not interrupt the starter circuit when the transponder is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical key lock safety switch.

Once you install this system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

Read the operation manual for operating the system. Do not install any component near the battery, gas pedal or shifting lever.

Some vehicles have a factory installed transponder immobilization system that can severely compromise the installation. There is a possibility that the system cannot be installed on some immobilized vehicles.

Some vehicles have an ABS or air system. The vehicle must not be installed on any vehicle with an ABS system.

Disconnect the air battery before beginning work on the vehicle.

Check battery grounds before driving any vehicle. Ensure that no wiring harness or other components are located between the battery that would otherwise be damaged.

The use of non-standard wiring lock, fuses or any wiring that wiring, i.e. repair parts will possibly obstruct connectivity into the alarm system and may result in false alarm or impaired operation. The suggested wiring of connection points.

Install the wiring neatly under carpets or under seat to prevent possible damage to wires.
