- This system must be installed and tested through a safety watch as it will not start if any forward or backward

Some automatic transmission owners may prefer the shifting and a control knob over the mechanical type gear shifting knob instead of electrical safety, water. The mechanical type does not transmit the driver's control of the transmission in any gear and does not offer the torque limit or safety required for the typical starting procedure. Therefore, any system should have the electrical or any control that can be mechanical type gear shifting knob.

- Once you install this system, you must verify that the sensors will not start to vary forward or backward (or regardless of the type of vehicle).
- Read the operation manual for monitoring.
- Do not change any component near the brake, gas pedal or steering knuckle.
- Some vehicles have a factory installed transponder (radioactive system that can identify complete the installation). There is a possibility that the system could be confused by some transponder-equipped vehicles.

- Most vehicles have an ABS or Reg system. Use correct care and do not probe any wires of the ABS system.
- Disconnect the car battery before beginning work on the system.

- Do not use conventional joint lock, hold or any string. Just string in rapid cuts will possibly stimulate continuously into the same system and may result in later stages of focused operation. We suggest building an individual system.

2. **Check for safety recall.** Go to www.safercar.gov to check for safety recalls on your vehicle.
