Civic 2006 Owners Manual:

Civic Education in the Twenty-First Century Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters

play the game If students work on an issue they care about politics will become a meaningful and positive experience This short how to guide takes students out of theoretical discussions of policy and into a world where they can affect change Graham BAD s goal is to have students identify a problem and then walk them through each step from researching the issue to getting others involved to engaging the media Each chapter starts with a real case showing citizens tackling a step in the process and ends with a summary checklist and a series of questions that help students put Graham BAD s game plan in action By offering students concrete guidance an array of resources and advice for troubleshooting and overcoming barriers this compact user BAD s guide gets students way beyond textbook learning Thirty five years ago as a member of the Florida Legislature Bob Graham took on the challenge of civic education for eighteen weeks at a Miami area high school His time as both a governor and a senator has only strengthened his resolve to pique students BAD curiosity about politics and teach them to get what they want from government
