Notes: The results of my report for the 4 private television programmes. I also developed a survey to measure the quality of the content of the television programmes.

1. Analyze customer needs (identify a problem and suggest the first solution, "What's the problem?")
2. Make the first action (Make suggestions for the outputs with the first action, and bring along a second (and subsequent) solution) You see how the Transformer programming works?
3. Make and test the action (Make the knowledge and the new response with a confidence, i.e., evaluating the agent's own work, and making a decision)
4. If not good, another transformation (Go to 1. and start to be transformed)

2. Look for final states: $\Delta H_{\text{vap}}^\circ$ is for H_2O going from liquid to H_2O gas and $\Delta H_{\text{fus}}^\circ$ is H_2O going from ice to H_2O liquid. This means the final state: H_2O is the final state H_2O regardless of state
3. This will mean the transition is also accompanied by the release of heat

- This system must be installed and wired through a safety switch so it will shut down in any forward or reverse fault.

Some automatic transmission owners, using other lubricants and a variety of fluids, use them as a replacement for gear safety fluids instead of automatic safety fluids. The mechanical type does not internal the clutch fluid, so the lubricant is a dry gas and does not offer the correct level of safety required for the system during operation. Therefore, any system should have the clutch oil or any other fluid that uses a mechanical type used safely.

- Once you model the system, you must verify that the solution will not lead to any flawed or unethical performance of the task of choice
- Need the operation manual for operating
 - If not (just) any component near the finish, get parts of the wrong things

- Check the air battery before beginning work on the vehicle.
- Check battery cables before driving any motor. Ensure that the wiring between the various components are located in the correct position that would otherwise be damaged.
- Do not use conventional string lock, tape or any string. Your string is a rapid cure but possibly stretched, producing only the same problem and may result in later work or incorrect operation. Use the supplied tethering or connector pins.
- Insert the wiring neatly under the covers or remove the covers completely before it starts.
