Serriere, 2015 As former elementary school teachers the authors focus on what is possible in schools rather than a romantic vision of what schools could be Based on a 5 year study of an elementary school this book shows how civic engagement can be purposive and critical a way to encourage young people to examine their environment to notice and question injustices and to take action to make a difference in their communities and school Focusing on the intersection of student voice and critical inquiry the book describes how to embed civic engagement into curriculum school decision making processes and whole school activities Chapters provide an overview of what research has demonstrated about civic engagement at the classroom school and community levels including detailed descriptions of activities and lessons for practice Classroom teachers school principals community members and teacher educators can use this resource to foster a deeper richer understanding of what is entailed in civic life Book Features A vivid portrait of a typical public school that wants to do more than teach to the test An examination of the conditions that enable young people to participate in democratic practices including identifying and questioning injustices Concrete examples of student voice and critical inquiry

Niemi, Jane Junn, 2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching **Making Citizens** Beth C. Rubin, 2012 Can social studies classrooms be effective makers of citizens if much of what occurs in these classrooms does little to prepare young people to participate in the civic and political life of our democracy Making Citizens illustrates how social studies can recapture its civic purpose through an approach that incorporates meaningful civic learning into middle and high school classrooms The book explains why social studies teachers particularly those working in diverse and urban areas should infuse civic education into their teaching and outlines how this

can be done effectively Directed at both pre service and in service social studies teachers and designed for easy integration into social studies methods courses this book follows students and teachers in social studies classrooms as they experience a new approach to the traditional history oriented social studies curriculum using themes essential questions discussion writing current events and action research to explore enduring civic questions Following the experiences of three teachers working at three diverse high schools Beth C Rubin considers how social studies classrooms might become places where young people study ponder discuss and write about relevant civic questions while they learn history She draws upon the latest sociocultural theories on youth civic identity development to describe a field tested approach to civic education that takes into consideration the classroom and curricular constraints faced by new teachers *Fundamentals of Civic Education* Engida Kassaye Amare,2003 *The New Civics* Roscoe Lewis Ashley,2023-07-18 This book is a textbook on civics and government for secondary school students Ashley provides an overview of the structure and functions of government at the local state and federal levels as well as an introduction to key concepts in citizenship and political participation The book incorporates case studies and real world examples to illustrate the practical application of these concepts This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Project Citizen** ,2008 This process oriented program for use in the middle grades focuses on the role of state and local governments in the U S federal system Local Civics with National Purpose J. Spencer Clark,2021-02-03 This book examines the development of civic education in the United States through the lives of two teachers at Shortridge High School SHS in Indianapolis around 1900 After situating civic education at the turn of the century the book describes the career of Laura Donnan her influences teaching extracurriculars and civic life through the lens of her unique epistemology shaped by negotiating the gendered ideologies of her era Then the book re examines Arthur W Dunn s career focusing on his ten years at SHS and the influence of Donnan on his popular community civics curriculum and subsequently the 1916 report The Social Studies in Secondary Education Previous scholars have overlooked Dunn s time at SHS viewing it simply as a stepping stone for the progressive educator s career This book argues that Dunn s time at SHS was pivotal to his career due to influential colleagues primarily Donnan To conclude Clark discusses the implications of Donnan s epistemology in shaping civic education in the United States **The Future of Civic Education** Elizabeth Yeager Washington,Keith C. Barton,2024-10-01 Speaking to the need to move beyond traditional formulations this textbook presents radical visions for transforming civic education in the United States Drawing on the experience of educators and scholars including those

rooted in feminist queer abolitionist global and race conscious perspectives this work offers new practical ideas for civic education reform Responding to recent political crises many scholars educators and public commentators have called for a rebirth of civic education but these all are grounded in the premise that the goal of civic education should be to teach students about the U S Constitutional system and how to operate within it This book argues that the U S governmental system including the Constitution is infused with racist and anti democratic premises and procedures It asks How can we seek a new path one that is more democratic more equitable and more humane A diverse range of leading civic educators who are willing not just to push the boundaries of civic education but to operate outside its assumptions altogether explore what future possibilities for civic education might look like and how these innovative ideas could be implemented in the classroom Combining theory with practice *The Future of Civic Education* will be important reading for those studying or researching in social studies methods social studies issues citizenship and civic education It will also be beneficial to social studies teachers at elementary and secondary levels as well as policymakers and non governmental organizations NGOs

Civic Education for Diverse Citizens in Global Times Beth C. Rubin, James M. Giarelli, 2013-10-11 This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the curriculum *Civic Education for Diverse Citizens in Global Times* directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory

The Morality of Democratic Citizenship Robert Freeman Butts, 1988 In recent years a number of political and educational leaders and groups have urged the nation s public schools to place a greater emphasis on teaching civic values and on educating students to become citizens This book puts forth the civic values and ideas that schools should be teaching The volume is not a handbook or curriculum guide but is designed to broaden the perspective of curriculum specialists textbook authors teachers and educational policymakers In the first three chapters of this four chapter book the study of and learning about history the study and learning about constitutional principles and the study and learning about conceptions of citizenship are examined The final chapter offers a set of 12 ideas and civic values that should suffuse teaching and learning in the schools These 12 values are justice equality authority participation truth patriotism freedom diversity privacy due process property and human rights DB *The Civic Education of American Youth* Policy Research Project on Civic Education Policies and Practices, Kenneth W. S. Watson,2005 What do we teach our citizens This great Platonic question is as crucial today as it has ever been America and the West come to terms with this question in the context of their richly diverse technologically sophisticated fundamentally individualistic societies Virtually all would agree that such diversity sophistication and freedom are positive political and cultural goods but many would also argue that they militate against the coherence that all regimes and civilizations must in some way demand The nature extent and coherence of civic education are perhaps the greatest determinants of a regime s politics and culture and the regime can in turn do much to foster the right kind of civic education This book presents the insights of renowned scholars and writers including Stephen H Balch Timothy Fuller and Roger Kimball who have thought
