Essential Civic Education for Senior Secondary Schools (SS1, SS2 & SS3) Gbenga M. This book deals with American citizens in their collective relations to one another. It treats also a few important individual relations which are of such importance socially that they are really public in character. It is easy to see why a high school textbook in civics should place emphasis first upon the citizen and citizenship, secondly upon the public as an organized group of citizens, and thirdly on the activities of the governments which the citizens have created and through which the public cares for many of its collective interests. Practically all of this material has been tried out in classes by the author and others and has been revised to meet high school needs as perfectly as possible. This book is really an introduction to the study of the new civics. The civics which is studied to day is naturally different from that of a generation ago and from that of a decade ago. The form and functions of many American governments have changed in the last quarter century; the spirit of American government has changed even more. The greatest change has been not in the government itself but in the purpose and aim of high school courses in civics. Once we were content to examine constitutions. Next we added an elaborate study of the organization of our governments. Still later we emphasized the activities of government as more important than constitutions and governmental machinery. Now we stress citizenship because the youthful citizen should know how society is organized and what he should do for society as well as what it does for him as a citizen and a member of that society. In the author's opinion the new civics is and should be the heart of the new high school course in the social sciences. Civic Education in the Twenty-first Century Michael T. Rogers,Donald M. Gooch,2015 With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the county The volume is broken into three major sections First there are four chapters exploring the history and philosophical

debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry *American Civics* Adelbert Grant
