learning became fully dependent on technology whether internet connected digital devices televisions or radios An Ed Tech Tragedy examines the numerous adverse and unintended consequences of the shift to ed tech It documents how technology first solutions left a global majority of learners behind and details the many ways education was diminished even when technology was available and worked as intended Using tragedy as a metaphor and borrowing the organization of a three act theatrical play the book shows how technology first modes of learning introduced novel health and safety risks handed significant control of public education to for profit companies expanded invasive digital surveillance and carried detrimental environmental repercussions in addition to adversely impacting educational access equity quality and outcomes in most contexts Dedicated sections consider alternative and less technology reliant educational responses to COVID 19 disruptions that had the potential to be more inclusive and equitable The analysis further explains how pandemic models of learning are rippling beyond school closures and influencing the future of education Holistically the work invites readers to reconsider a turbulent chapter in education history and reexamine the purposes and roles of technology in education

New Media and Revolution Billie Jeanne Brownlee,2020-07-16 The Arab Spring did not arise out of nowhere It was the physical manifestation of more than a decade of new media diffusion use and experimentation that empowered ordinary people during their everyday lives In this book Billie Jeanne Brownlee offers a refreshing insight into the way new media can facilitate a culture of resistance and dissent in authoritarian states Investigating the root causes of the Syrian uprising of 2011 New Media and Revolution shows how acts of online resistance prepared the ground for better organised street mobilisation The book interprets the uprising not as the start of Syria s social mobilisation but as a shift from online to offline contestation and from localised and hidden practices of digital dissent to tangible mass street protests Brownlee goes beyond the common dichotomy that frames new media as either a deus ex machina or a means of expression to demonstrate that in Syria media was a nontraditional institution that enabled resistance to digitally manifest and gestate below within and

parallel to formal institutions of power To refute the idea that the population of Syria was largely apathetic and apolitical prior to the uprising Brownlee explains that social media and technology created camouflaged geographies and spaces where individuals could protest without being detected Challenging the myth of authoritarian stability New Media and Revolution uncovers the dynamics of grassroots resistance blossoming under the radar of ordinary politics *World Meetings* ,1978

Stopping the Spies Jane Duncan,2018-06-01 Is South Africa on its way to becoming a surveillance state and will it need a whistleblower In 2013 former National Security Agency NSA contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden s revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control especially of those considered to be politically threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses **Water and Energy International** ,2014

Go Tell the Crocodiles Rowan Moore Gerety,2018-02-06 In the tradition of Katherine Boo s Behind the Beautiful Forevers an unforgettable exploration of the trials of daily life in Mozambique long heralded as Africa s rising star Over the past twenty five years Mozambique has charted a path of dizzying economic growth nearly as steep as China s making it among the fastest growing economies on the planet But most Mozambicans have little to show for the long boom to travel in Mozambique is to see much of the promise of development as a mirage And in the fall of 2016 a debt crisis unraveled layers of corruption that reverberated across Europe heralding what many in the financial world feared might be the beginning of a global financial shockwave The Guardian Go Tell the Crocodiles explores the efforts of ordinary people to provide for themselves where foreign aid the formal economy and the government have fallen short Author Rowan Moore Gerety tells the story of contemporary Mozambique through the heartbreaking and fascinating lives of real people from a street kid who flouts Mozambique s child labor laws to make his living selling muffins to a riverside community that has lost dozens of people to crocodile attacks Moore Gerety introduces us to a nation still coming to grips with a long civil war and the legacy of colonialism even as it wrestles with the toll of infectious disease and a wave of refugees weaving stories together into a
