Business Studies November 2014 Scope:

Sustainable Investing Cary Krosinsky, Sophie Purdom, 2016-12-08 A seminal shift has taken place in the world of investing. A clear and overarching reality has emerged which must be solved: financial considerations must factor in sustainability considerations for ongoing societal success while sustainability issues equally need to be driven by a business case. As a result, investment practices are evolving especially towards more positive philosophies and frameworks. Sustainable Investing brings the reader up to speed on trends playing out in each region and asset class drawing on contributions from leading practitioners across the globe. Implications abound for financial professionals and other interested investors as well as corporations seeking to understand future investment trends that will affect their shareholders thinking. Policymakers and other stakeholders also need to be aware of what is happening in order to understand how they can be most effective at helping implement and enable the changes arguably now required for economic and financial success. Sustainable Investing represents an essential overview of sustainable investment practices that will be a valuable resource for students and scholars of sustainable banking and finance as well as professionals and policymakers with an interest in this fast moving field.

Handbook on the Economics of the Internet Johannes M. Bauer, Michael Latzer, 2016-05-27 The Internet is connecting an increasing number of individuals, organizations and devices into global networks of information flows. It is accelerating the dynamics of innovation in the digital economy affecting the nature and intensity of competition and enabling private companies, governments and the non profit sector to develop new business models. In this new ecosystem many of the theoretical assumptions and historical observations upon which economics rests are altered and need critical reassessment.

Handbook of Research on International Entrepreneurship Strategy Pervez N. Ghauri, V.H. Manek Kirpalani, 2015-11-27 This impressive Handbook provides a dynamic perspective on the international entrepreneurial strategies of SMEs including the role and experience of their founders as well as the collaboration of these SMEs in networks with larger firms. The expert contributors from all over the world and the editors explore the origin and evolution of internationalizing SMEs, the changing history and the future outlook of this sector. They study the effects of different cultures on the origin and growth of entrepreneurship and SMEs. The Handbook also outlines the various types of Born Globals that emerge from different parts of the world. This book will prove essential reading for researchers and students of international business, entrepreneurship and SMEs. Founders of internationalizing SMEs will also learn about novel management practices whilst educational institutions and governments will find invaluable insights on how to foster and support SMEs in their internationalization efforts.

Cities Interrupted Shirley Jordan, Christoph Lindner, 2016-02-25 *Cities Interrupted* explores the potential of visual culture in the form of photography, film, performance, architecture, urban design and mixed media to strategically interrupt processes of globalization in contemporary urban spaces. Looking at cities such as Amsterdam, Beijing, Doha, London, New York and Paris, the book brings together original essays to reveal how the concept of interruption in global cities enables new

understanding of the forms of space experience and community that are emerging in today's rapidly transforming urban environments. The idea of interruption addressed in this book refers to deliberate interventions in the spaces and communities of contemporary cities: interventions that seek to disrupt or destabilize the experience of everyday urban life through creative practice. Interruption is used as an analytic and conceptual tool to challenge and explore alternatives to the narratives of speed, hyper mobility, rapid growth and incessant exchange and flow that have dominated critical thinking on global cities. Bringing art and creative practice into the centre of discussions about the future of cities alongside discussions of development, design, justice, health, sustainability, technology and citizenship, this book is essential reading for anyone working at the intersections of a range of urban, cultural and visual fields including urban studies, urban design and architecture, visual studies, cultural studies, media studies, art history and social and cultural geography.

Consumer Involvement in Private EU Competition Law Enforcement Maria Ioannidou, 2015-09-03. Despite the growing importance of consumer welfare in EU competition law debates, there remains a significant disconnect between rhetoric and reality as consumers and their interests still play only an ancillary role in this area of law. *Consumer Involvement in Private EU Competition Law Enforcement* is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide-ranging examination of the need for more active consumer participation in competition law. Written by an expert in the field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU law perspective. It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment. Finally, the book identifies key institutional and political obstacles to the adoption of effective measures and suggests alternative routes to enhance the role of consumers in private competition law enforcement. The book's innovative approach, combining normative analysis and practical solutions, makes it invaluable for academics, policy makers and practitioners in the field.

Exporting Transnational Education Vangelis Tsiligiris, William Lawton, 2018-07-04. This book focuses on the dynamic and rapidly expanding field of transnational higher education (TNE). Despite the increasing importance of TNE and the interest it has attracted from various stakeholders, there is a lack of theoretical and empirical evidence on several aspects pertaining to its operation and governance. This book provides a unique combination of contributions from researchers and practitioners in a wide variety of case studies from TNE exporting countries in Europe and Asia. In doing so, the editors, with added support from Dr Christopher Hill, examine how this gap between research and practice can be bridged. This valuable edited collection will be of use to researchers and practitioners in transnational education as well as students and scholars of international education and higher education policy.
