Sustainability and Management Kıymet Çalıyurt, Ülkü Yüksel, 2017-07-14 In the wake of the 1987 Brundtland Report sustainable development has become key to the management systems within businesses and a means by which companies can increase their long term value Being a sustainable company increasingly means staying alive in business and has become a necessity for all kinds of enterprises from the micro sized to global corporations In more recent years many companies and indeed governments have looked at sustainability as a means to combat the multiple challenges of environmental accidents global warming resource depletion energy poverty and pollution However being sustainable or maintaining sustainability is not an easy task for a company's management function It needs continuous support and engagement from the board the executive management staff and other stakeholders alike Additionally it brings

extra costs to the company in terms of hiring trained staff organising continuous training in the company publishing sustainability reports and subscribing to a rating system Sustainability must be nourished by a company's board as well as by all of its departments such as accounting marketing and human resources By the same token it is not enough for a company simply to declare itself a sustainable business or rely on past measures and reputation sustainability is an ongoing activity and one which has to be proved by periodically disclosing sustainability reports according to international rating systems In Sustainability and Management An International Perspective K ymet al yurt and lk Y ksel bring together international authors from a variety of specialisations to discuss the development aspects problems roadmap trends and disclosure systems for sustainability in management The result is a lively insightful exposition of the field **Subject Guide to Books in Print**
