Student's book : [with English-German wordlists]* Vicki Hollett, 2001 Business Objectives is a course for managers and students of business who have reached a lower intermediate level of English Based on a carefully constructed language syllabus the fifteen units also tackle the key functional areas of business interaction such as telephoning meetings and socializing The course places special emphasis on skills work particularly listening and speaking and is designed to enable students to relate the language they are learning to their own work experience *Higher Education Revolutions in the Gulf* Fatima Badry, John Willoughby, 2015-10-08 Over the past quarter century the people of the Arabian Peninsula have witnessed a revolutionary transformation in higher education In 1990 there were fewer than ten public universities that offered their Arabic language curricula in sex segregated settings to national citizens only In 2015 there are more than one hundred public semi public and private colleges and universities Most of these institutions are open to expatriates and national citizens a few offer gender integrated instruction and the language of instruction is much more likely to be in English than Arabic Higher Education Revolutions in the Gulf explores the reasons behind this dramatic growth It examines the causes of the sharp shift in educational practices and analyses how these new systems of higher education are regulated evaluating the extent to which the new universities and colleges are improving quality Questioning whether these educational changes can be sustained the book explores how the new curricula and language policies are aligned with official visions of the future Written by leading scholars in the field it draws upon their considerable experiences of teaching and doing research in the Arabian Gulf as well as their different disciplinary backgrounds linguistics and economics to provide a holistic and historically informed account of the emergence and viability of the Arabian Peninsula's higher education revolutions Offering a comprehensive critical assessment of education in the Gulf Arab states this book represents a significant contribution to the field and will be of interest to students and scholars of Middle East and Gulf Studies and essential for those focused on higher education The Business Education World ,1924 Yearbook - Eastern Commercial Teachers' Association Eastern Commercial Teachers Association (U.S.),1929 *Los Angeles School Journal* ,1922 **The Business Educator** ,1924 *The Journal of the National Education Association* National Education Association of the United States,1925 *Documentary History of Education in Upper Canada* Ontario. Department of Education,1906 Case Method and Pluralist Economics Kavous Ardalan,2017-12-09 This book discusses the relationship between pluralist economics and the case study method of teaching advocating the complimentary use of both to advance economics education Using a multi paradigmatic philosophical frame of analysis the book discusses the philosophical methodological and practical aspects of the case study method while drawing comparisons with those of the more commonly used lecture method The book also discusses pluralist economics through the

exposition of the philosophical foundations of the extant economics schools of thought which is the focal point of the attention and admiration of pluralist economics More specifically the book discusses the major extant schools of thought in economics Neo Classical Economics New Institutional Economics Behavioral Economics Austrian Economics Post Keynesian Economics Institutional Economics Radical Economics and Marxist Economics and emphasizes that these schools of thought in economics are equally scientific and informative that they look at economic phenomena from their certain paradigmatic viewpoint and that together they provide a more balanced understanding of the economic phenomenon under consideration Emphasizing paradigmatic diversity as the cornerstone of both the case method and pluralist economics the book draws the two together and makes an effective case for their combined use A rigorous multi faceted analysis of the philosophy methodology and practice of economics education this book is important for academicians and students interested in heterodox economics philosophy and education
