## **Business Studies November 2012 Memo:**

**Russia's Changing Economic and Political Regimes** Andrey Makarychev, Andre Mommen, 2013-07-18 The book reveals the interconnection between social cultural and political protest movements and social and economic changes in a post communist country like Russia still dominated by bureaucratic rulers and oligarchs controlling all basic industries and mining activities Those interests are also dominating Russia's foreign policy and explain why Russia did not succeed in becoming an integral part of Europe The latter is at least wished by many Russian citizens The Ministry of Public Input J. Lees-Marshment, 2015-01-13 As political leaders acknowledge the limits of their power they increasingly integrate constructive input from inside and outside government into their decision making A Ministry or Commission of Public Input is necessary to collect process and communicate input more effectively and politicians need to work with the public to identify solutions

**The Privatization of Israeli Security** Shir Hever, 2017-11-20 Between 1994 2014 Israel's security service was transformed becoming one of the most extreme examples of privatised security in the world This book is an investigation into this period and the conditions that created Occupation Inc the institution of a private military security industrial complex State sponsored violence is increasing as a result of this securitisation but why is it necessary and what are its implications In this book Shir Hever considers the impact of the ongoing Palestinian resistance to Israeli occupation the influence of U S military aid and the rise of neoliberalism in Israel to make sense of this dramatic change in security policy Through the lens of political economy this book shows how the Israeli security elites turn violence into a commodity in order to preserve their status and wealth providing a fresh new perspective on the Israeli occupation

**China and the Geopolitics of Rare Earths** Sophia Kalantzakos, 2018 Rare earths are elements that are found in the Earth's crust and are vital ingredients for the production of a wide variety of high tech defense and green technologies everything from iPhones and medical technologies to wind turbines efficiency lighting smart bombs and submarines While they are not particularly rare in availability they are difficult and expensive to mine Yet China has managed to gain control over an estimated 97 percent of the rare earth industry since the 1990s through cheap production high export taxes and artificial limitations of supply Rare earths and China's monopoly over them became international news after China unofficially curtailed exports to Japan the United States and Europe in 2010 This embargo followed a collision between Chinese and Japanese boats in the East China Sea a locus of geopolitical and economic tension between the two countries Although the World Trade Organization forced China to scrap its restrictions it still holds a stranglehold over these elements that are so critical to the economic and security interests of the United States and its allies In this book Sophia Kalantzakos argues that the 2010 rare earth crisis signaled more than just a trade dispute Rather it raises questions about China's use of economic statecraft and must be regarded as a part of the larger discourse of global power relations Importantly she also argues that the failure of political actors in major industrial nations to enact comprehensive and effective policy solutions or the scientific and business

communities to devise sustainable rare earth production outside of China points to future resource competition Focusing on China s monopoly over the rare earth industry China and the Geopolitics of Rare Earths examines the impacts of growing worldwide resource competition and the complexities policymakers face as they develop strategies and responses in an increasingly globalized world

Economic Commission for Africa,2014 For millions of Africans growth is yet to translate into jobs and better living conditions Africa s largely commodity driven growth has not been matched by the much needed structural change that can lead to economic transformation employment and reduced poverty Market failures necessitate industrial policy interventions Yet in the absence of the right processes and institutions good industrial policies will fail Indeed weak institutions and poor policy design have hindered industrial policy This report gives a framework for getting the policy process right to foster industrialization It uses 11 country case studies to assess the critical ingredients for spurring industrialization innovative institutions effective processes and flexible mechanisms and structural transformation
