### **The Armed Forces: Instrument of Peace, Strength, Development and Prosperity** Joseph Babatunde

Fagoyinbo, 2013 Across the ages technological developments have been accelerated by the military. This results from the fact that able bodied vibrant youths are generally involved and are also exposed to high tech training prevailing at their times for assignments defence and security that are essential but not desired. They form the Armed Forces for the nations. Such brilliant military officers like Caesar and Napoleon made their marks and in contemporary times the Armed Forces of United States France Britain Australia etc are making remarkable contributions to technological developments. Such infrastructure as the Internet the GPS and the cell phones are products that have significant military contributions. This book scans across the major regions of the world highlights the efforts of representative countries in the regions and observes that nations that have harnessed the efforts of their Armed Forces have progressively developed. It is also observed that developments in America and Europe though not entirely dependent on their Armed Forces have been greatly affected by their efforts. In Asia such countries as the People's Republic of China Brazil India Pakistan and Singapore utilise the human and material resources within the Armed Forces for national growth and cohesion. Development effort is least in the African Region except South Africa and Egypt notwithstanding the high potentials as exhibited by Nigeria's Armed Forces. Although attempts to industrialise through the Armed Forces may be able to create economic development for developing nations such factors as historical background economic resources political climate government policies and infrastructure are equally important. Economic development programme of an aspiring country should i promote education and access to knowledge ii aspire to economic self sufficiency in economic power iii allow and promote private sector and foreign participation in defence production research and development iv commit itself to the establishment and support of defence industries v indigenise defence programmes establish a balance between military and economic development and vi mobilise the nation's economy through technology partnership with the private sector and foreign investors.

*The New Presence of China in Africa* Meine Pieter Dijk, 2025-10-01 This book describes China's growing range of activities in Africa especially in the sub Saharan region. The three most important instruments China has at its disposal in Africa are development aid investments and trade policy. The Chinese government which believes the Western development aid model has failed is looking for new forms of aid and development in Africa. China's economic success can partly be ascribed to the huge availability of cheap labour which is primarily employed in export oriented industries. China is looking for the required raw materials in Africa and for new marketplaces. Investments are being made on a large scale in Africa by Chinese state controlled firms and private companies particularly in the oil producing countries Angola Nigeria and Sudan and countries rich in minerals Zambia. Third the trade policy China is conducting is analysed in China and compared with that of Europe and the United States. In case studies the specific situation in several African countries is examined. In Zambia the mining industry construction and agriculture are

described One case study of Sudan deals with the political presence of China in Sudan and the extent to which Chinese arms suppliers contributed to the current crisis in Darfur The possibility of Chinese diplomacy offering a solution in that conflict is discussed The conclusion considers whether social responsibility can be expected of the Chinese government and companies and if this is desirable and to what extent the Chinese model in Africa can act as an example or not for the West
