

4	JOINT ANGLE	OUTSIDE REGISTRATION COLUMN	INSIDE REGISTRATION COLUMN
4	90°	45°	
5	81°	54°	
6	75°	60°	
8	67.5°	67.5°	

## 5. EDGE MITER JOINTS (See Figure 24)

Edge miter joints are most commonly used in box structures or for making multisided pedestals where you would like to hide the end grain. Once again, biscuit joinery is an outstanding method to use both for added strength as well as ease of assembly. Follow the steps below to assemble a 90° joint.

- Position the workpieces as they are to be assembled and layout biscuit locations on the outside of the joint.
- Set up tool by first setting fence angle to 90°. Make the fence adjustment such that the biscuit is located toward the inside of the joint where the material is thicker. Then select the biscuit size so that the blade does not protrude through the outside wall when the cut is made (see Figure 25).
- Clamp the workpiece and align the tool as shown in column in Figure 25.
- Turn on the tool and make the plunge cut.
- Glue, assemble and clamp the joint.

For joints other than 90°, see inside registration column in Figure 27 for proper fence angle setting. The above method will produce a joint where the outside surfaces of the joint are aligned. If you wish to produce a joint where the inside surfaces are aligned, use the following procedures for a 90° joint.

- Position workpieces as they are to be assembled.
- Layout biscuit locations on the inside of the angle.
- Set up tool by setting fence angle to 45°. Set vertical fence adjustment so that the biscuit is located toward the inside of the joint where material is thicker. Select biscuit size so that the blade does not protrude through the outside face of the material.
- Clamp the workpiece and align the tool as shown in Figure 26.
- Make the plunge cut and repeat for all biscuit locations.
- Glue, assemble and clamp the joint.
- For joints other than 90°, see inside registration column in Figure 27 for proper fence angle setting.

## 6. T-JOINTS (Figure 28)

Biscuit joining is a viable alternative to dadoing when making a T-joint. T-joints are most commonly used when attaching shelves to the sides of a case. The method described below will work if your shelf material is at least 3/8" thick.

- Place the workpieces on a work surface exactly as you will be assembling them in the form of an upside down "T". Mark lightly along the joint where the top of the shelf is to end up (see Figure 30). Mark biscuit locations at the joint interface on the shelf piece only.
- Use the shelf down on the mating workpiece. Clamp the two workpieces together and to the work surface in this position (see Figure 31).
- Set up the tool by selecting the proper biscuit size and setting the adjustable fence angle at 0°.
- Using the bottom registration surface, align the tool with the biscuit location marks and make a vertical and a horizontal plunge cut for each biscuit location as shown in Figure 32.
- Glue, assemble and clamp the joint.

## Repairs

To ensure product SAFETY and RELIABILITY, repairs, maintenance and adjustment (including brush inspection and replacement) should be performed by certified service centers or other qualified service organizations, always using identical replacement parts.

## ACCESSORIES

Recommended accessories for use with your tool are available at extra cost from your local service center. If you need any assistance in locating any accessory, please contact DeWALT Industrial Tool Co., 20 Fletcher Road, Mooraburn, VIC 3128, Australia or call 1800 654 155.

**CAUTION:** The use of any non-recommended accessory may be hazardous.

## Guarantee

Applicable to hand held Power Tools, Laxers and Nailers.

## Three Year Limited Warranty

DeWALT will repair, without charge, any defects due to faulty materials or workmanship for three years from the date of purchase. Please return the complete unit, transportation prepaid, to any DeWALT Service Centre, or any authorized service station.

For warranty repair information, call 1800 654 155.

This warranty does not apply to:

- Accessories
- Damage caused where repairs have been made or attempted by others.
- Damage due to misuse, neglect, wear and tear, alteration or modification.

This warranty gives you specific legal rights and you may have other rights under the provisions of the Consumer Guarantee Act 1993 (New Zealand only), Trade Practices Act 1974 and State Legislation (Australia only). In addition to the warranty, DeWALT tools are covered by our:

## FREE ONE YEAR SERVICE CONTRACT

DeWALT will also maintain the tool for free at any time during the first year of purchase. This includes labour, parts and lubrication required to restore the product to sound mechanical and/or electrical condition. Normal wear parts are not covered in this service. Carbon brushes worn more than 50% will be replaced.

**NOTE:** Three Year Warranty is not applicable to items deemed as consumables. Radial arm saws are covered by a one (1) year warranty only. DeWALT reserves the right to review its warranty policy prior to launch of any new business development products.

## 30 DAY NO SATISFACTION GUARANTEE

If you are dissatisfied with any DeWALT power tool, laser or nailer, for any reason, simply return it to the point of purchase with your sales receipt within 30 days for a replacement unit or a full refund.

**FREE WARNING LABEL REPLACEMENT:** If your warning labels become illegible or are missing, call 1800-654-155 for a free replacement.
